SUMMARY OF INDUSTRY IN WHICH THE COMPANY IS OPERATING

GLOBAL OUTLOOK

Global economic activity continues to soften, amid the effects of tight monetary policies, restrictive financial conditions, and weak global trade growth. After a sharp slowdown in 2022 and another decline last year, global output growth is set to edge down in 2024, marking the third consecutive year of deceleration. The recent conflict in the Middle East has heightened geopolitical risks and raised uncertainty in commodity markets, with potential adverse implications for global growth. This comes while the world economy is continuing to cope with the lingering effects of the overlapping shocks of the past four years—the COVID-19 pandemic, the Russian Federation’s invasion of Ukraine, and the rise in inflation and subsequent sharp tightening of global monetary conditions.

Growth in advanced economies as a whole and in China is projected to slow in 2024 to well below its 2010-19 average pace. Meanwhile, aggregate growth is set to improve in EMDEs with strong credit ratings, remaining close to pre-pandemic average rates. Although overall growth is also expected to firm somewhat from its 2023 low in EMDEs with weak credit

ratings, the outlook for many such countries remains precarious, given elevated debt and financing costs, and idiosyncratic headwinds such as conflict.

Long-term yields on advanced-economy government bonds were volatile in 2023, reflecting shifting expectations about the path of future interest rates and sizable movements in term premia. Although yields have retreated from their late-October peaks, they still imply increased fiscal vulnerabilities, given that median global government debt has risen by 20 percentage points of GDP since 2007, when U.S. yields were last at their current levels. The drag on growth from monetary tightening is expected to peak in 2024 in most major economies, assuming an orderly evolution of broader financial conditions. Thus far, headwinds to growth from elevated interest rates have been offset, to some degree, by households and firms spending out of savings buffers, resilient risk appetite, and extended maturities on stocks of low-cost debt, as well as by expansionary fiscal policy in some cases, most notably the United States.

Global trade growth in 2023 was the slowest outside global recessions in the past 50 years, with goods trade contracting amid pandemic global industrial production. Services trade has continued to recover from the effects of the pandemic, but at a slower pace than previously expected. Global trade growth is projected to pick up to 2.3 percent in 2024, partly reflecting a recovery of demand for goods and, more broadly, in advanced-economy trade.

INDIAN ECONOMY

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

INFRASTRUCTURE SECTOR IN INDIA

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US \$26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban

infrastructure development. In other words, the infrastructure sector acts as a catalyst for India’s economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects.

To meet India’s aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as ‘Make in India’ and the production-linked incentives (PLI) scheme to augment the growth of infrastructure sector. Historically, more than 80% of the country’s infrastructure spending has gone toward funding for transportation, electricity, and water& irrigation. While these sectors still remain the key focus, the government has also started to focus on other sectors as India’s environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

Investor should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. To obtain a more complete understanding, you should read this section together with Sections titled, “Business Overview”, “The Issue”, “Industry Overview”, “Restated Financial Information”, “Outstanding Litigation and Other Material Developments”, and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page no. 115, 48, 102, 182, 199 and 184 respectively, as well as the other financial and statistical information contained in this Prospectus.

Any of the following risks, as well as the other risks and uncertainties discussed in this Prospectus, could have an adverse effect on our business, financial condition, results of operations and prospects and could cause the trading price of our Equity Shares to decline, which could result in the loss of all or a part of your investment. The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial conditions and Prospects.

This Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements because of certain factors, including the considerations described below and elsewhere in this Prospectus.

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the effect is not quantifiable and hence has not been disclosed in such risk factors. You should not invest in this Issuing unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Restated Standalone Financial Statements prepared in accordance with Indian GAAP, as per the requirements of the Companies Act, 2013, and SEBI (ICDR) Regulations.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some risks may not be material individually but may be material when considered collectively.
2. Some risks may have material impact qualitatively instead of quantitatively.
3. Some risks may not be material at present but may have a material impact in the future.

INTERNAL RISK FACTORS:

1. **Majority of our revenues are generated from state of Gujarat. Any adverse development affecting our operations in this region could have an adverse impact on our business, financial condition and results of operations.**

We derive 89.74 % of our revenue from State of Gujarat for the financial year ended March 31, 2024. Such geographical concentration of our business in this region heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in this region which may adversely affect our business prospects, financial conditions and results of operations. We may not be able to leverage our experience in these regions to expand our operations in other parts of India.

Revenue from projects undertaken in the state of Gujarat for the past four financial years is mentioned in the table below:

(₹ in lakhs, unless stated otherwise)

Particulars	For the Financial Year ended			
	March 31, 2024	March 31, 2023	March 31, 2022	March 31, 2021
Total Revenue from operations	11,393.16	4,555.70	3,555.34	3,072.08
Revenue from projects in Gujarat	10,223.99	3,884.00	566.33	496.86
% of Total Revenue	89.74	85.26	15.93	16.17

The concentration of our business in Gujarat subjects us to various risks, including but not limited to:

- Regional slowdown in construction activities in the state;
- vulnerability to change of policies, laws and regulations or the political and economic environment of Gujarat;

- constraint on our ability to diversify across states; and
- perception by our potential clients that we are a regional construction company, which may hamper us from competing or securing orders for large and complex projects at the national level.

While we strive to geographically diversify our project portfolio and reduce our concentration risk, we cannot assure you that developments in Gujarat will not impact our business. If we are unable to mitigate the concentration risk, we may not be able to develop our business effectively and our business, financial condition and results of operation could be adversely affected.

2. Significant portion of our revenues is concentrated from a limited number of clients. The loss of any of our significant clients may have an adverse effect on our business, financial condition, results of operations, and prospect.

For the financial years ended March 31, 2024, March 31, 2023, March 31, 2022 and March 31, 2021, our revenue from top five (5) and top ten (10) clients are as follows:

(₹ in Lakhs)

For further details, please see “Our Business – Order Book” on Page 115.

Significant revenue from a limited number of clients increases the potential volatility of our results and exposure to individual contract risks. We may be required to accept onerous contractual terms in our contracts for projects awarded to us by such clients. While, our Company has not experienced such instances in the past, in the event our Company is unable to comply with its obligations in any contract with such top five (5) and top ten (10) clients, it would result in a substantial reduction in the number of contracts awarded by such client in future resulting in an impact on the overall business and revenue generated by the Company from such client. Further, such concentration of our business on selected projects or clients may have an adverse effect on our results of operations.

We cannot assure you that we can maintain the same levels of business from our top clients. Furthermore, events such as adverse market conditions, any restructuring or changes in the regulatory regime, could adversely affect our clients and consequently impact our business.

Our experience in the infrastructure sector and ability to offer timely and efficient completion of work as per the agreed terms has enabled us to maintain our continued eligibility and become pre-qualified for bidding in contracts offered by our clients. However, in the event we are unable to complete our projects within the time period prescribed under our contracts or within extended period of contract, or the quality of our work deteriorates, then our relationship with our clients may get severed and we may not get further orders from our current clients which could adversely affect our business.

3. Our business is working capital intensive involving relatively long implementation periods. We require substantial financing for our business operations. Our indebtedness and the conditions and restrictions imposed on by our financing arrangements could adversely affect our ability to conduct our business.

Typically, projects in the infrastructure sector which we undertake are working capital intensive in nature and involve long implementation periods. This requires us to obtain financing through various means. As on March 31, 2024, our total short-term borrowings stood at ₹ 1,441.93 Lakhs. We may incur additional indebtedness in the future. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in the Company, and could adversely impact our Equity Share price.

Furthermore, the objects of the Issue include funding working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “*Objects of the Issue*” on page 80. Our working capital requirements may be affected due to factors beyond our control including force majeure conditions, delay or default of payment by our clients, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

4. Our failure to perform in accordance with the standards prescribed in work order of our client could result in loss of business or compensation payment.

We received work orders with deadlines from our clients. Majority of these work orders may require us to comply with the code of conduct and rules and regulations prescribed by our clients, which may increase our compliance costs. We may be unable to effectively address service constraints or accurately predict service requirements, as a result of which our clients may experience service shortfalls. Further any disruptions to our businesses as a result of actions outside of our control, could significantly impact the continued performance of our obligations to meet the quality or performance standards set out in our client contracts which may in-turn harm and cause clients to terminate their contracts with us, impair our ability to obtain renewal of our contracts from existing clients and impair our ability to grow our client base, any of which could affect our business, financial condition and results of operations. In the event that we are unable to meet the prescribed obligations, we may also be required to pay compensation to our clients on the terms set out in our contracts. In certain instances, we may also be required to bear consequential liability. Certain work order may also require us to provide indemnities to our clients with respect of any negligent act or omission by or misconduct of our employees. In the event there is an increase in claims against us for which we are not insured, our business, financial condition and results of operations may be affected.

5. We have certain outstanding litigation against us, an adverse outcome of which may adversely affect our business, reputation and results of operations.

If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by

complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

6. *Our positioning in terms of size/operation in the state of Gujarat may not be maintained.*

We are one of the significant players in the state of Gujarat in water supply projects. The construction industry in Gujarat is characterized by intense competition and a dynamic market environment. We operate in a sector with numerous players, including established largescale construction firms and also small local contractors. Our positioning in the state of Gujarat may get downgraded in terms of its size/operations due to entry of national/global players in the industry or by faster growth of our competition in comparison to our Company.

While we strive to geographically diversify our project portfolio and reduce our dependency on certain state, we cannot assure you that adverse developments associated with the region will not affect our business.

7. *Our Restated Financial Statements are reviewed and Signed by the Peer Review Auditors who is not Statutory Auditors of our Company as required under the provisions of ICDR.*

Although, our statutory auditor, M/s PARY & Co., Chartered Accountants, is holding valid peer review certificate, issued by the Peer Review Board of the Institute of Chartered Accountants of India, as on the date of this Prospectus, our Restated Financial Statements are reviewed and signed by M/s. SVJK and Associates, Chartered Accountants, the Peer Review Auditors who is not the Statutory Auditor of the company.

8. *Projects undertaken through a joint venture may be delayed on account of the performance of the joint venture partner or, in some cases, significant losses from the joint venture may have an adverse effect on our business, results of operations and financial condition.*

While we execute most of the projects ourselves, we also form project-specific joint ventures and consortiums with other entities in the infrastructure and construction business. For instance, when a project stipulates certain specific eligibility requirements such as type of experience and expertise, we bid for such projects through joint venture entities formed for being eligible to bid for such specific projects. In such cases, the completion of the contract also depends on the performance of our joint venture partner(s).

If the joint venture partner fails to perform its obligations as per the requirements of the contract, it could result in breach of the terms of the contract awarded to the joint venture and we may be required to pay penalties and/or liquidated damages, or the client may invoke our performance guarantees. Further, given that the liability of joint venture partners is joint and several, in the event our joint venture partner fails to perform its obligations, we would be liable for completion of the entire project awarded to such joint ventures. Failure to effectively protect ourselves against risks for any of these reasons could expose us to costs and potentially lead to material losses, which could adversely affect our business, results of operations and financial condition.

The inability of a joint venture partner to continue with a project under any unforeseeable circumstance, may lead to an additional responsibility on us for completion of the project and correspondingly greater share of the financial risk of the project. Any disputes that may arise between us and our joint venture partners may cause delays in completion or the suspension of the project.

9. *There is no assurance of customer continuity in our business and we are required to submit bids for each project on a competitive basis.*

The growth of our business depends on our ability to obtain projects including by way of being awarded tenders pursuant to competitive bidding process. The construction industry in India is highly competitive. While selecting contractors for a project, clients generally award the tender to contractors that prequalify based on several criteria including project execution experience, technical strength, performance capabilities, financial soundness, quality standards, etc. Besides, the bid price also forms a key factor for selection. The bidding process is necessarily followed for award of contracts by our clients even though we may have been selected and successfully executed earlier projects for the same clients.

The government-conducted tender processes may also be subject to change in qualification criteria. If we are not able to outgrow the eligibility standards compared to that of our competitors, we may not be successful in bidding for various projects, thereby attracting disqualification and making us ineligible for submitting such proposals. Further,

even if we meet the pre-qualification criteria, there is no assurance that we will be able to quote most competitive / lowest proposal amongst all applicants for obtaining the contracts.

These factors may limit us in getting contracts and may result in affecting our business, prospects, financial condition and results of operation.

10. *Bidding for a tender involves various management activities such as detailed project study and cost estimations. Inability to accurately estimate the cost may lead to a reduction in the expected rate of return and profitability estimates.*

For every project, a notice for invitation of tender is issued by the relevant government or statutory body which requests interested participants to offer their bids. Prior to making a bid for a particular project and participating in a tender, we undertake various activities such as management discussions, project feasibility study, site study, cost estimations, materials and equipment suppliers, required for calculation of the estimated cost of the project. Moreover, other ancillary expenses such as market escalation, supervisory, design, contingency expenses and profitability margins, depending from project to project, is also considered for determining the final bid amount.

Accordingly, all of the bid amounts are based on estimates of the project cost, the fluctuation of which, either marginally or substantially, may impact our margins adversely. Further, we may incorrectly or inadequately estimate the project cost leading to lower bid amount affecting our profitability, in case the project is awarded to us. Excess estimation of costs may lead to higher bid amount by us owing to which, we may not be awarded a contract which may substantially impact our results of operations and financials. Although we strive to achieve success for every bid we make, there is no guarantee that we would be successful in winning all the projects that we bid for.

Further, as most of the projects involve long implementation periods (i.e., are spread over a longer period of time), cost escalation in our industry is a frequent issue although most of the agreements includes clauses relating to cost escalations. Therefore, any sudden fluctuations in costs or material availability or any other unanticipated costs will substantially impact the business operations, cash flows and financial condition.

11. *Our ongoing projects are exposed to various implementation risks and uncertainties and may be delayed, modified or cancelled for reasons beyond our control, which may adversely affect our business, financial condition and results of operation.*

As on the date of prospectus, we have 15 major on-going projects involving laying of pipelines and construction of water treatment plants etc. The execution of these projects involves various implementation risks including delays attributable to construction, supply of materials, obtaining government and statutory approvals, unanticipated increase in cost, force majeure events, cost overruns or disputes with our joint venture partners. Further, we are subject to various risks associated with regulatory approvals and financial requirements for the execution of these projects, which may render the projects unprofitable.

Certain implementation risks and uncertainties which may be experienced by us, in the conduct of our business include:

- (a) Significant additional costs due to project delays;
- (b) Clients seeking liquidated damages on account of failure to achieve the project timelines;
- (c) Termination of contracts or rejection in extension of project timelines;
- (d) Inability to avail finance required for the execution of the project at affordable costs;
- (e) Inability to provide the requisite guarantees / enter into financial arrangements, as required under project contracts / agreements;
- (f) Unforeseen issues arising out of engineering designs for the projects, disputes with workers, force majeure events and unanticipated costs due to any amendments in plans and specifications;
- (g) Risk of equipment failure or industrial accidents that may cause injury and loss of life, and severe damage to and destruction of property and equipment;
- (h) Availability and price increase in relation to the materials and skilled manpower required for the execution of the project;
- (i) Inability of the relevant authorities to fulfil their obligation prior to construction of a project, in accordance with the relevant contracts, resulting in unanticipated delays;
- (j) Delays on account of performance of the sub-contractors or the joint ventures of the Company.

12. *We operate in the construction industry where there are low entry barriers. Our failure to successfully compete may adversely affect our business, financial condition, results of operations and prospects.*

We are an EPC company with experience in design and construction of various infrastructure projects for the State Government, local bodies and private bodies. Our principal business operations are broadly divided into four categories: (i) **Water Pipeline Construction**; (ii) **Irrigation Projects** and (iii) **Road Construction** (iv) **Building Construction**. Our Company operates in an intense competitive landscape.

The construction sector is characterized by low barriers to entry, wherein large or small enterprises who may be operating in other sectors can build up pre-qualifications, independently or through joint ventures, and bid and compete with us for projects in this sector. The presence of numerous competitors, including both established and newly qualified entities, may result in heightened competition for projects, contracts, and clients.

13. We have entered into a number of related party transactions and may continue to enter into such transactions under AS 18, in the future, and there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties.

We have, in the past, entered into related party transactions with various parties. A summary statement of the related party transactions is as follows:

While we believe that our past related party transactions have been conducted on an arm's length basis, the Company confirm that these transactions are in compliance with the relevant provisions of the Companies Act, 2013, and all other applicable laws.. Furthermore, it is likely that we will continue to enter into related party transactions in the future. There can be no assurance to you that such transactions in the future or any other future related party transactions that we may enter into, individually or in the aggregate, will not have an adverse effect on our business, cash flows, financial condition and results of operations. Further, such transactions in the future or any future transactions with our related parties, either individually or in the aggregate, may potentially involve conflicts of interest. Additionally, there can be no assurance that any dispute that may arise between us and related parties will be resolved in our favour.

14. Our profitability and results of operations may adversely be affected in the event of any disruption in the supply of materials or an increase in the price of materials, fuel costs, labour etc.

The timely and cost-effective execution of our projects is dependent on the adequate and timely supply of key materials such as cement, steel, pipes etc. We cannot assure you that we will be able to procure the required and adequate supplies of materials in the future, on commercially acceptable terms. If we are unable to procure the requisite quantities of materials on timely basis on commercially acceptable terms, the performance of our business and results of operations may be adversely affected.

Further, the cost of materials, fuel for operating our construction and other equipment, labor and other inputs constitutes a significant part of our operating expenses. The prices and supply of materials depend upon factors that are beyond our control, including but not limited to general economic conditions, transportation costs, global and domestic market

prices, competition, production levels, import duties, and these prices are cyclical in nature. Our ability to pass on increases in the purchase price of materials, fuel and other inputs may be limited in the case of contracts with limited price escalation provisions. These variations and other risks generally inherent to the construction industry may result in our profits from a project being less than as originally estimated or may result in our experiencing losses. For details, please see “*Restated Financial Information – Restated Statement of Profit and Loss*” on page 182.

15. *We cannot assure that the construction of our projects will be free from any or all defects, which may adversely affect our business, financial condition, results of operations and prospects.*

In the course of our operations, we may encounter construction faults on account of factors including design related deficiencies arising in our projects. Such construction related faults typically result in revision / modification to our design and engineering, thereby resulting in increased interest cost due to delay, increase in estimated cost of operations on account of additional work executed towards rehabilitation and further expenditure incurred towards appointment of external consultants for assistance in revising our design. We may not be able to recover such increased costs from our clients in part, or at all, and may further be subject to penalties, including liquidated damages on account of such construction faults arising in our projects. We may further face delays in the estimated project completion schedule in respect of such projects on account of additional works required to be undertaken towards rectifying such construction faults, and are dependent upon our clients’ permitting extension of time of completion of such projects.

We cannot assure that the construction of our projects will be free from any and all defects. If the work undertaken by us is not to the satisfaction of the client, it has to be done again as per the instructions of person in charge at the site without any extra cost. Further, there can be no assurance that any cost escalation or additional liabilities would be fully offset by amounts due to us pursuant to the guarantees and indemnities, if any, provided by our contractors or insurance policies that we maintain. Further, we also cannot assure you as to whether our clients will permit such revised completion schedule to be implemented to the extent necessary or at all and we may be held in breach of the terms and conditions of the contracts in respect of such projects pertaining to completion schedule.

In the event of discovery of defects / faults in the work undertaken by us, or any damages to our construction work due to factors beyond our control, or any of the other reasons, we may incur significant contractual liabilities and losses under our projects contracts and such losses may materially and adversely affect our financial performance and results of operations. Further, such construction faults may result in loss of goodwill and reputation, and may furthermore have a material and adverse impact our eligibility in respect of future bids made by us towards projects, thereby affecting our future operations and revenues.

16. *Our business requires us to obtain and renew certain registrations, licenses and permits from government and regulatory authorities and the failure to obtain and renew them in a timely manner may adversely affect our business operations and some of the approvals are required to be transferred in the name of ‘V.L.Infraprojects Limited’.*

Our business operations require us to obtain and renew, from time to time, certain approvals, licenses, registrations and permits under central, state and local government rules in India, generally for carrying out our business and for our manufacturing facilities. Some of these approvals are granted for a limited duration. While we are required to obtain a number of approvals for legally conducting our business operations and we shall submit the applications for renewal of such approvals, as and when required, during the course of our business operations, we cannot assure you that we will be able to obtain approvals in respect of such applications, or any application made by us in the future. If we fail to obtain such registrations and licenses or renewals, in a timely manner, we may not then be able to carry on certain operations of our business, which may have an adverse effect on our business, financial condition and results of operations. For details, see “*Government Approvals*” on page 206 of this Prospectus.

We have submitted certain applications to various regulatory authorities seeking approvals and licenses. For details, please refer ‘Pending Approvals’ under the section titled “*Government Approvals*” of this Prospectus. There can be no assurance that the relevant authorities will issue such permits or approvals to us or that they will be issued on time. Further, these permits, licenses and approvals are subject to several conditions and we cannot assure you that we will be able to continuously meet the conditions, which may lead to cancellation, revocation or suspension of relevant permits/licenses/approvals.

Additionally, we will need to apply for renewal of certain approvals, licenses and registrations, which need to update pursuant to conversion of Private to Public Company i.e. from V.L.Infraprojects Private Limited to V.L.Infraprojects Limited.

17. *We may be unable to identify or acquire new projects and our bids for new projects may not always be successful, which may stunt our business growth. Further, any delay in the commencement or cancellation of the projects awarded to us may adversely affect our business, prospects, reputation, profitability, financial condition and results of operation.*

Our revenues are derived primarily from contracts awarded to us on a project-by-project basis, and a significant number of projects in the construction industry are undertaken on a non-recurring basis.

In the event that we are not able to continually and consistently secure new projects of similar or higher value as the ones that we have executed in the past or are currently executing, and on terms and conditions that are favourable to us, our financial performance, our results of operations and cash flows may be adversely affected or fluctuate materially from time to time depending on the timing and nature of such contracts. Accordingly, it is difficult to predict whether and when we will be awarded a new project. If we are unable to identify or acquire new projects matching our expertise or profit expectations or obtain the requisite consents from regulatory authorities or other relevant parties when required or at all, we may be subject to uncertainties in our business.

18. Our inability to successfully implement our business plan, expansion and growth strategies could have an adverse effect on our business, financial condition, cash flows and results of operations.

We have expanded our operations and experienced substantial considerable growth over the last few years. We cannot assure you that we will be able to maintain our historical growth rates or our market position. Such growth requires us to manage complexities across all aspects of our business, including those associated with Managing Capex Plant of the company increased headcount, execution on new lines of business and implementations of appropriate systems and controls to grow the business. Our continued growth requires significant time and attention from our management and may place strains on our operational systems and processes, financial systems and internal controls and other aspects of our business. We cannot assure you that we will be able to successfully implement our business expansion plans and growth strategies. If any of the aforementioned risks were to materialize, our business, financial condition, cash flows and results of operations may be adversely affected.

19. We have certain contingent liabilities that have not been provided for in our Company's financials which if materialized, could adversely affect our financial condition.

The following table sets forth our contingent liabilities for the financial year ended March 31, 2024, March 31, 2023 and March 31, 2022 and March 31, 2021 as per the Restated Financial Information:

20. Any failure to accurately estimate the overall risks, revenues or costs in respect of a project, may adversely affect our profitability and results of operations. Our actual cost in executing a contract or in constructing a project may vary substantially from the assumptions underlying our bid. We may be unable to recover all or some of the additional expenses, which may have a material adverse effect on our results of operations, cash flows and financial condition.

Under the terms and conditions of agreements for our projects, we generally agree to receive from the customers an agreed sum of money, subject to contract variations covering changes in the client's project requirements. We may enter into agreements for the construction of projects in the future which may not contain price escalation clauses covering increase in the cost of construction materials, fuel, labour and other inputs. Accordingly, our actual expense in constructing our construction projects may vary substantially from the assumptions underlying our bid for several reasons, including, but not limited to unanticipated increases in the cost of construction materials, fuel, labour or other inputs, unforeseen construction conditions, including the inability to obtain requisite approvals and licenses resulting in delays and increased costs, delays caused by local weather conditions and suppliers' failures to perform. Our ability to pass-on increases in the purchase price or the cost of raw materials and other inputs may be limited in the case of contracts with limited or no price escalation provisions and there can be no assurance that these variations in cost will not lead to financial losses to our Company. Further, other risks generally inherent to the construction industry may result in our profits from a project being less than as originally estimated or may result in us experiencing losses due to cost and time overruns, which could have a material adverse effect on our cash flows, business, financial condition and results of operations.

21. Failure to successfully implement our business strategies may materially and adversely affect our business, prospects, financial condition and results of operations.

We aim to implement our business strategies to ensure future business growth, which may be subject to various risks and uncertainties, including but not limited to the following:

- Failure to maintain our competitive edge due to cost overruns or failure to execute our construction projects in a timely manner or according to quality specifications.
- intensified competition, delayed payments or non-payments by our clients and associated litigation or arbitration proceedings and inability to enforce escalation clauses in our construction contracts.
- failure to implement our bidding strategy.
- inability to make an efficient use of or improve our execution system or fail to maintain or operate our equipment bank, IT/ERP systems and centralized procurement system in an effective and efficient manner.
- lack of ability to properly manage financing resources and unavailability of funds at affordable costs or maintain financial discipline.
- adverse changes in applicable laws, regulations or policies or political or business environments.
- inability to diversify across states or into different business segments.
- lack of ability to recruit or retain skilled employees.
- failure to correctly identify market trends relating to the demand for our services, inability to carry out our strategy of acquiring new construction projects or optimize our existing project portfolio; and
- increases in costs of raw materials, fuel, labour and equipment and adverse movements in interest rates and foreign exchange rates.
- Corrupt Practices of Fraud or improper conduct

Implementation of our strategies may be subject to a number of risks and uncertainties including the ones mentioned above, some of which are beyond our control. There can be no assurance that we will be able to execute our growth strategy on time and within the estimated costs, or that we will meet the expectations of our clients. In order to manage growth effectively, we must implement and improve operational systems, procedures and controls on a timely basis, which, as we grow and diversify, we may not be able to implement, manage or execute efficiently and in a timely manner or at all, which could result in delays, increased costs and diminished quality and may adversely affect our results of operations and our reputation. Any failure or delay in the implementation of any of our strategies may have a material adverse effect on our business, prospects, financial condition and results of operations.

22. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

23. Our operations may be adversely affected in case of industrial accidents, physical hazards and similar risks at our construction sites, which could expose us to material liabilities, loss in revenues and increased expenses.

While construction companies, including us, conduct various scientific and site studies during the course of bidding for projects, there are always anticipated or unforeseen risks that may arise due to adverse weather conditions, geological conditions, specification changes and other reasons. Additionally, our operations are subject to hazards inherent in providing engineering and construction services, such as risk of equipment failure, work accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. Use of heavy machineries, handling of sharp parts of machinery by labor during construction activities etc. may result in accidents, causing injury to our laborers, employees or other persons on the site and may prove fatal. Our Company has not faced any material instances of industrial accidents, physical hazards and similar risks at our construction sites in past. However, our policy of covering these risks through contractual limitations of liability, indemnities and insurance may not always be effective and this may have a material adverse effect on our reputation, business, financial condition and results of operation.

24. We have incurred substantial indebtedness which exposes us to various risks which may have an adverse effect on our business and the results of operations.

As of March 31, 2024, we have ₹ 1,654.81 Lakhs of outstanding debt as per restated financials of the Company.

Our level of indebtedness has important consequences to us, such as:

- Increasing our vulnerability to general adverse economic, industry and competitive conditions;
- Limiting our flexibility in planning for, or reacting to, changes in our business and the industry;
- affecting our credit rating;
- Limiting our ability to borrow more money both now and in the future; and
- Increasing our interest expenditure and adversely affecting our profitability, since almost all of our debt bears interest at floating rates.

25. *Our Company has in the past has made certain inadvertent erroneous filings under Companies Act, 2013. Further, there have also been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings.*

Our Company has in the past has made certain inadvertent erroneous filings under Companies Act, 2013. Further, there have also been instances where our Company has inadvertently filed incorrect information with the RoC in its statutory filings, amended from time to time, as mentioned below:

Company had passed Ordinary Resolution for private placement instead of Special Resolution of members as required under Section 42 and 62(1)(c) for allotment of equity shares as on December 1, 2017 for 500000 Equity Shares.

Company had failed to attach PAS-5 and PAS-4 attachment in Form PAS-3 for further issue of allotment of 290000 equity shares on January 13, 2016.

Certified copy of members resolution and altered Memorandum of Association was not attached in Form SH-7 filed for increased in Authorised Share capital from ₹ 300.00 Lakhs to ₹ 685.00 Lakhs.

Company had failed to file Form MGT-14 and to take approval of members for conversion of unsecured loan into equity on December 1, 2017.

Although the late filing fees levied are small but if we continue this practice, the accumulated amounts of each delay may adversely affect our cash flows. Further no- show cause notice has been issued against our Company till date, in respect of above, in the event of any cognizance being taken by the concerned authorities in respect of above, actions may be taken against our Company and its directors, in which event the financials of our Company and our directors may be affected. Further we cannot assure you that we may not do delay filings in future and not be subjected to penalty or interest. Further with the expansion of our operations there can be no assurance that deficiencies in our internal controls and compliances will not arise, or that we will be able to implement, and continue to maintain, adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all.

26. *There have been certain discrepancies in our corporate records and compliances in past. While we have not been subjected to any penalty till date, we are not sure any such non-compliance shall not occur in future.*

Our Company had made allotments of equity shares on further issue basis on January 13, 2016, further the Company had made allotment of equity shares on private placement basis and December 01, 2017. Although all other conditions with respect to the allotment had been complied but the Company had failed to open a separate bank account for aforesaid allotments, a nominal part of the share application money was utilized on November 30, 2017 due to urgent need of funds. The non-compliances were unintentional and occurred due to lack of proper professional advice and without any malafied intentions.

Further the Company has allotted 17,40,000 equity shares as bonus on June 30, 2020. Although all documents related to the allotment were correct, an amount of ₹ 4,35,00,000/- was capitalized towards issue of bonus shares instead of ₹ 1,74,00,000/- , inadvertently ₹ 2,61,00,000/- was classified as securities premium. The above was not a non-compliance and simply wrong classification of reserves and necessary corrections have accordingly been incorporated in restated financials as stated in the RHP.

Our company has taken significant steps to address past non-compliances and ensure ongoing compliance with regulatory requirements. We have filed adjudication applications for past allotments made on January 13, 2016, and December 01, 2017, under Section 454 of the Companies Act, 2013, to seek adjudication of defaults under Section 42 read with Section 62 of the Companies Act, 2013. Furthermore, we have restated our financial statements to correct the oversight in the classification of reserves for the bonus shares allotment on June 30, 2020. This includes the correction of entries related to the issue of bonus shares.

We had filed a suo-moto application for adjudication in terms of Section 454 of the Companies Act, in the above matters and the notice was issued for which hearing was held on June 26, 2024. In respect of the said matter, the Company had appeared through its counsel and have made its representations post which no communication from the concerned authority is said to have been issued. The matter is pending with the concerned authority. We are not sure if any penalty shall not be levied against the Company in respect of the adjudication applications filed in respect of

default under the provisions of Section 42 and Section 62 of the Companies Act, 2013. Further, we cannot assure you that such non-compliances will not occur in the future. In the event of any penalty being imposed against the Company by the concerned authority, the financials of the company shall be adversely affected.

27. Risks Associated with Unsecured Loans:

As on March 31, 2024, our Company has unsecured loans amounting to ₹ 541.30 Lakhs from Banks and financial institutions. For further details of unsecured loans of our Company, please refer “Annexure I.3 & I.7” respectively under chapter titled “Restated Financial Information” beginning on page 182 of this Prospectus.

The repayment of these unsecured loans is subject to various risks, including:

- **Interest Rate Risk:** Changes in interest rates could affect the cost of borrowing and the Company's ability to refinance its debt.
- **Liquidity Risk:** The Company's ability to meet its financial obligations and invest in its growth could be impacted by the need to repay these loans, potentially affecting its liquidity.
- **Credit Risk:** The risk of default by the lenders on their obligations to the Company, which could lead to a loss of the loan amount or require the Company to seek additional financing.
- **Regulatory Risk:** Changes in banking regulations or the financial health of the lending institutions could affect the terms of the loans or the Company's ability to obtain new financing.

28. Our lenders have charge over our movable and immovable properties in respect of finance availed by us.

We have secured outstanding debt of ₹ 1,113.51 Lakhs as on March 31, 2024 and we have secured our lenders by creating charge over our movable and immovable properties. In the event we default in repayment of the loans availed by us and any interest thereof, our properties may be forfeited by lenders. It may have a material adverse effect on the business, cash flows and financial condition of our company. For further information on the financing and loan agreements along with the total amounts outstanding, please refer to section titled “Restated Financial Information” on page 182 of this Prospectus.

29. Our success depends largely on the skill, experience and continued efforts of our senior management, skilled professionals and unskilled workers and our ability to attract and retain skilled and unskilled personnel.

We depend significantly on the expertise, experience and continued efforts of the members of our senior management team and other key employees. Our continued success also depends upon our ability to attract and retain a large group of skilled professionals and staff, particularly project managers, engineers, and skilled workers. For instance, we believe that our Chairman and Managing Director & CEO namely Mr. Rajagopal Reddy Annam Reddy, who has over more than 20 years of experience in construction industry. Further, our management team also comprises of a number of qualified, experienced and skilled professionals who have several years of experience across various sectors. Our Company is heavily dependent on the members of our senior management for business development and acquiring new projects, and any inability of these members to execute their responsibilities could result in a loss of business.

The loss of the services of our senior management or our inability to recruit, train or retain a sufficient number of skilled professionals could have a material adverse effect on our operations and profitability. Competition for senior management in the industry in which we operate is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. We believe that as a result of the recent growth in the construction industry in India and the expected future growth, the demand for both skilled professionals and staff and unskilled workers has significantly increased in recent years. We may lose skilled workers to competing employers who pay higher wages or be forced to increase the wages to be paid to our employees. If we cannot hire or retain enough skilled professionals or unskilled workers, our ability to bid for and execute new projects or to continue to expand our business will be impaired and consequently, our revenues could decline. Any such loss of the services of our senior management personnel or skilled professionals could adversely affect our business, prospects, financial condition and results of operation.

30. We are exposed to the risks of malfunctions or disruptions of information technology systems.

We depend on information technology systems and accounting systems to support our business processes, including designing, planning, execution, procurement, inventory management, quality control, product costing, human resources and finance. Although these technology initiatives are intended to increase productivity and operating efficiencies, they may not achieve such intended results. These systems may be potentially vulnerable to outages due to fire, floods, power loss, telecommunications failures, natural disasters, computer viruses or malware, break-ins and similar events. While, our Company has not experienced such instances in the past, effective response to such disruptions or malfunctions will require effort and diligence on the part of our third-party distribution partners and employees to avoid any adverse effect to our information technology systems.

31. A significant number of our project contracts prescribe a requirement for maintaining retention money during the defect liability period. Any dispute or delay to obtain a release of such retention monies in a timely manner or at all may have an adverse impact upon our profitability, results of operations and financial position.

A some of the projects that we have undertaken, or currently undertake, prescribe a requirement for maintaining retention money during the defect liability period. The defects liability period typically commences upon the provision of the virtual or final completion certificate to us by our customers. There can be no assurance that such retention money will be remitted by our clients to us on a timely manner. We may make provisions for bad debts, which includes those arising from release of retention money. Any delay to obtain a release of such retention monies, may have an adverse impact upon our profitability, results of operations and financial position.

32. We may need to raise additional capital in the future for working capital and we may not be able to do so on favourable terms or at all, which would impair our ability to operate our business or achieve our growth objectives, which may have an adverse effect on our results of operations and business.

Our business requires us to raise funds from various sources and we have significant working capital requirements to undertake a variety of activities for the successful implementation of the projects, such as the purchase or manufacturing of raw materials and mobilization of resources, before the aggregate payment is received from clients. Further, delays in completion of our current projects can also raise our working capital requirements resulting from increased financing costs including increased costs of raw materials causing us to exceed our budget. It is generally difficult to predict whether or when a particular contract we have bid for will be awarded to us and the time period within which we will be required to mobilize our resources for the execution of such contract. Any increase in the number and size of the projects awarded to us will result in a further increase in our working capital requirements. Additionally, our working capital requirements may increase if, in certain contracts, payment terms include reduced advance payments or payment schedules that specify payment towards the end of the project or are less favorable to us.

Our estimated requirement for working capital is based on certain assumptions, including the period of commencement and timeframe for execution of a project. Any change of such assumptions would result in changes to our working capital requirements. Additionally, our requirement for working capital may vary from that estimated in the section “Objects of the Issue” beginning on page 80 in this Prospectus, leading to a shortfall in the working capital requirement at our end. Accordingly, our working capital estimates may prove to be inaccurate and consequently, there may be insufficient arrangements with respect to the net proceeds from the issue, borrowings, bank finance or institutional finance. Thus, we may need to incur additional indebtedness in the future to satisfy our working capital requirements. Our working capital needs thus require continued access to significant amounts of capital on acceptable terms in the future as well. There can be no assurance that we will be successful in obtaining the adequate working capital which will adversely affect our cash flows, business, results of operation and financial condition.

33. Wage pressures and increases in operating costs in India may prevent us from sustaining our competitive advantage and may reduce our profit margins.

Wage costs as well, as operating costs, in India have historically been significantly lower than wage costs and operating costs in the other developed economies; and these reduced costs have been one of the sources of our competitive strengths.

However, wage and operating expense increases in India may prevent us from sustaining this competitive advantage and may negatively affect our profit margins. Wages in India are increasing at a faster rate than in the developed economies, which could result in increased employee benefit expenses. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition.

34. Our business is capital intensive. Difficult conditions in the global capital markets and the global economy generally may adversely affect our business and results of operations and may cause us to experience limited availability of funds. We cannot assure you that we will be able to raise sufficient financing on acceptable terms, or at all.

Our business is capital intensive, requiring substantial capital to develop and market our projects. The actual amount and timing of our future capital requirements may also differ from estimates as a result of, among other things, unforeseen delays or cost overruns in developing our projects, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources, we will be required to seek additional debt or equity financing. Additional debt financing, if available, could increase our interest cost and require us to comply with additional restrictive covenants in our financing agreements. In addition, the Indian regulations on built-up infrastructure and construction and development projects impose significant restrictions on us, including the types of financing activities we may engage in. Our ability to obtain additional financing on favourable commercial terms, if at all, will depend on a number of factors, including:

- Our results of operations and cash flows;

- The amount and terms of our existing indebtedness;
- General market conditions in the markets where we operate; and
- General condition of the debt and equity markets.

In addition, changes in the global and Indian credit and financial markets may affect the availability of credit to our customers and decrease in demand for our development. Our inability to obtain funding on reasonable terms, or at all, would have an adverse effect on our business and results of operations.

35. *We source a large part of our new orders from our relationships with our customers, both present and past. Any failure to maintain our long-standing relationships with our existing customers or forge similar relationships with new ones would have a material adverse effect on our business operations and profitability.*

We believe that our focus on completing projects in a timely manner and on quality has helped us build strong relationships with our customers and bolster our reputation in the industry in which we operate. Further, we have received additional projects from several of our existing customers despite increased competition in the region within which we operate. If any of our relationships with our existing customers were to be altered or terminated and we are unable to forge similar relationships with new customers in the future, our business, financial condition, results of operations, cash flows and business prospects could be materially and adversely affected.

36. *We may not be able to adequately protect our intellectual property, which could harm the value of our brand and services.*

Generating and maintaining recognition for our brand is critical to our business. The success of our business depends on our ability to use our trademarks in order to compete effectively in existing markets and increase penetration and awareness for our brand and further promote our business in newer markets. However, it is possible that we are not aware of misuse of our trademarks which could potentially cause loss of our reputation, which could impact our business and may even affect our goodwill.

While we have endeavoured to register our trademarks that we use or have used in the past, even if these trademarks are not registered, those that have garnered a reputation over the years and are associated with us are protected under common law allowing us to prevent a third party from using a deceptively similar or identical mark and from any unauthorized use of the mark. The use of a deceptively similar or identical third-party mark may result in a loss/injury to us. While for registered trademarks, we have greater protection because of the statutory protection afforded against similar marks being used /registered for similar services, we may not be able to adequately protect unregistered marks that are not as well recognized. Although our company has not encountered any unauthorized use of our intellectual property in the past, we may not be able to ensure protection of the same in future. For further details, please see “Government Approvals” on page 206.

37. *Our Promoters and members of Promoter Group or third party have provided their personal guarantees to certain loan facilities availed by us, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.*

Our Promoter, members of promoter group or third party have provided personal guarantees in relation to certain loan facilities availed of by us. In the event that any of these guarantees are revoked by promoter, members of Promoter group or third party, the lenders for such facilities may require alternate properties as mortgages/guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities.

We may not be successful in procuring alternative properties/guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial condition.

38. *We face significant competition and if we fail to compete effectively, our business, prospects, financial condition and results of operations will be adversely affected.*

We operate in a competitive environment and our industry has been frequently subject to intense price competition for the acquisition and bidding of projects. Our competition varies depending on the size, nature and complexity of the project and on the geographical region in which the project is to be executed. We compete against major construction companies at the national and local levels and in multiple segments of construction business. For further details, please see the section entitled “Business Overview- Competition” on page 115. While service quality, technological capacity and performance, health and safety records and personnel, as well as reputation and experience, are important considerations in clients’ decisions, price is a major factor in most contract awards. We may thus be compelled to bid for new projects more aggressively than we expected and may accept terms and conditions that are not in our favour. If we fail to win new projects, we may not be able to increase, or maintain, our volume of business or revenues. Failure

to compete effectively against our current or future competitors may have a material and adverse effect on our business, financial condition and results of operation.

Further, some of our competitors may be larger than us, have stronger financial resources or a more experienced management team, or have stronger engineering capabilities in executing technically complex projects. They may also benefit from greater economies of scale and operating efficiencies and may have greater experience in construction business. Further, the premium placed on having experience may cause some of the new entrants to accept lower margins in order to be awarded a contract. We may also decide not to participate in some projects as accepting lower margins may not be financially viable and this may adversely affect our competitiveness to bid for and win future contracts. We cannot assure you that we can continue to compete effectively with our competitors in the future, and failure to compete effectively against our current or future competitors may have an adverse effect on our business, results of operations and financial condition. Competition can place downward pressure on our contract prices and profit margins, and may force us to accept contractual terms and conditions that are not normal or customary for us, thereby increasing the risk that we may have losses on such contracts. Intense competition is expected to continue in these markets, presenting us with significant challenges in our ability to maintain strong growth rates and acceptable profit margins. If we are unable to meet these competitive challenges, we could lose market share to our competitors and experience an overall reduction in our profits.

39. The Company is dependent on few suppliers for purchase of product. Loss of any of these large suppliers may affect our business operations.

Our top ten suppliers contribute 82.87%, 84.90%, 64.09% and 67.85% of our total purchase from operations for the financial year ended on March 31, 2024, 2023, 2022 and 2021, respectively. We cannot assure that we will be able to get the same quantum and quality of supplies, or any supplies at all, and the loss of supplies from one or more of them may adversely affect our purchases of stock and ultimately our revenue and results of operations. However, the composition and amount of purchase from these suppliers might change as we continue seek new suppliers for our product for better quality and price in the normal course of business. Though we believe that we will not face substantial challenges in maintaining our business relationship with them or finding new suppliers, there can be no assurance that we will be able to maintain long term relationships with such suppliers or find new suppliers in time. The details of contribution of top suppliers in purchase of total purchase is given below:

Particulars	% contribution to total purchases of materials and stock in trade			
	For the year ended March 31, 2024	For the year ended March 31, 2023	For the year ended March 31, 2022	For the year ended March 31, 2021
Top 1 Supplier	27.99	35.18	19.82	23.49
Top 3 Suppliers	63.41	64.28	41.42	37.29
Top 5 Suppliers	72.52	76.90	53.83	48.46
Top 10 Suppliers	82.87	84.90	64.09	67.85

40. Dependence on Permit Extensions and Potential Project Delays

Our operations are significantly dependent on obtaining and maintaining permits for our ongoing projects. Currently, we have applied for permit extensions for the following ongoing projects:

1. GWSSB/HME - Kudasán Project
2. GWSSB- Barwala Project
3. GWSSB/SPUN - Dhanduka Project

Current Status:

We have submitted applications for extensions for the above ongoing projects, but approval is pending with the Government. Delays or denials of these extensions could have a material adverse effect on our financial condition and results of operations.

Potential Impacts:

- **Project Completion Delays:** Unapproved extensions could lead to delays in project completion, impacting our ability to meet contractual obligations and recognize revenue. This could result in lost profits and potential penalties for missed deadlines.
- **Increased Costs:** Delays may necessitate additional costs for labor, materials, or equipment due to changes in market conditions or the need to extend existing contracts.

- Disruption of Operations: Delays in ongoing projects could disrupt our overall operations and impact our ability to take on and to complete new projects, hindering our growth plans.

The pending approval of permit extensions for our ongoing projects poses a significant risk to our operations and financial performance. We are actively engaging with the relevant government authorities to expedite the approval process

41. *We engage sub-contractors and other agencies in our business. The timely and successful completion of our projects in certain cases depends upon the cooperation of our sub-contractors, and any failure or delay in successful completion could adversely affect the quality of our developments and adversely affect our profitability, business and reputation.*

We rely on third parties for the implementation of projects where we have entered into arrangements with them for the supply of labour, equipment and raw material. Accordingly, the timing and quality of construction of our projects also depends on the availability and the skill of such sub-contractors. Typically, construction contracts are subject to specific completion schedule requirements with liquidated damages chargeable in the event that a project falls behind schedule. Thus, where we sub-contract any part of a project, the completion of the project in a timely manner often depends, in part, upon the performance of our sub-contractors. Delay or failure on the part of sub-contractors to complete their work on time, for any reason, could result in additional costs to us and damage to our reputation.

Additionally, the amount of such additional costs could have an adverse effect on our profit margins on the project. While we may seek to recover these amounts as claims from the relevant supplier, vendor, sub-contractor or other third party responsible for the delay or for providing non-conforming products or services, we cannot assure you that we will recover all or any part of these costs in all circumstances. Performance problems for existing and future projects could cause our actual results of operations to differ materially from those anticipated by us and could damage our reputation within our industry and consequently, have a detrimental effect on our customer base.

42. *Our reliance on raw material suppliers for our business operations exposes us to a variety of risks which could materially disrupt our operations.*

Timely and cost effective execution of our projects is dependent on adequate and timely supply of raw materials, chief amongst them being steel, cement, Concrete, Brick etc.. We have not entered into any long term contracts or supply arrangements with any of the Company's suppliers and if, for any reason, the Company's primary suppliers should curtail or discontinue their delivery of such materials in the quantities needed, the Company's ability to meet its material requirements for construction contracts could be impaired, its construction schedules could be disrupted, and the Company may not be able to complete construction contracts as per schedule or at such costs that were anticipated.

If the Company is unable to procure the requisite quantities of construction materials in time and at commercially acceptable prices, the performance of its financial results and business prospects could be adversely affected.

43. *We could be adversely affected if we fail to keep pace with technical and technological developments in the construction industry.*

Our recent experience indicates that clients are increasingly developing larger, more technically complex projects using more advanced technologies. Our future success will depend, in part, on our ability to respond to technological advances and emerging technology standards and practices on a cost-effective and timely basis. To meet our clients' needs, we need to continuously update existing technology and equipment for our construction services. To meet our clients' needs, we must continuously update our existing systems and develop new technologies for our construction projects. In addition, rapid and frequent technological and market demand changes can often render existing technologies and equipment obsolete and result in requirements for additional and substantial capital expenditures and/or significant write downs of our assets. The cost of upgrading or implementing new technologies, upgrading our existing equipment or expanding capacity could be significant. If we fail to anticipate or respond adequately to our clients' changing requirements or keep pace with the latest technological developments, our business, prospects, financial condition and results of operations may be materially and adversely affected.

44. *Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or labour contractor or sub-contractor any other kind of disputes with our employees or labour contractor or sub-contractor*

Our operations depend upon the productivity of workforce, which may be affected by labour disputes involving our sub-contractors or employees or labour contractor. We may experience business disruptions due to strikes, work stoppages or demands for wage increases. Labor unions may order their members to stop working at our construction sites or allege violations of employee rights, laws or agreements. Currently, we do not have any organized union activities. Construction activities at our worksites may be suspended and our projects may be significantly delayed if we fail to negotiate with the sub-contractors, employees or labours, or find acceptable solutions in a timely manner.

Sometimes, we may engage independent contractors to assist us in undertaking our projects. It is possible that we may be held responsible for wage payments to the workers engaged by such independent contractors should they default on wage payments.

45. We require certain regulatory and statutory approvals and licenses required in the ordinary course of our business, and the failure to obtain, maintain and renew these approvals in a timely manner or at all, may adversely affect our business and operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions, and certain applications have been made at the appropriate stages to the relevant authorities for operating our business. If we fail to obtain, maintain and renew any of such approvals or licenses, in a timely manner or at all, the projects for which such licenses are required, and our business may be adversely affected. Furthermore, in our construction business, government delays in obtaining approvals may result in cost increases in the price of construction materials from original estimates which cannot generally be passed on to clients and may also adversely affect our ability to mobilize our equipment and manpower. There can be no assurance that the relevant authorities will issue these approvals or licenses, or renewals thereof in a timely manner, or at all. Our government approvals, licenses, clearances and consents are often also subject to numerous conditions, some of which are onerous and require substantial expenditure. If we fail to comply, or a regulator claims we have not complied, with these conditions, our business, financial conditions and results of operations would be materially adversely affected. For further information, please see the section titled “Government Approvals” on page 206 of this Prospectus.

46. Our Company had negative cash flow from operating activity in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows based on Restated Financial Statements is summarized in below table and our Company has reported negative cash flow from operating activity in the financial years is as mentioned below, which could affect our business and growth:

Net increase/(decrease) in cash and cash equivalents	144.10	12.18	12.81	(23.29)

47. The average cost of acquisition of Equity shares by our Promoters is lower than the Issue price.

Our Promoter’s average cost of acquisition of Equity shares in our Company is lower than the Issue Price of Equity shares as given below:

Sr. No.	Name of Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹)*
1.	Mr. Rajagopal Reddy Annam Reddy	4880625	2.10
2.	Mrs. Mydhili Rajagopal Reddy	3750375	0.72
3.	Mr. Nageswara Rao Repuri	1130250	1.49

* The average cost of acquisition of equity shares by our promoters has been calculated by taking into account the amount paid by him to acquire shares by way of allotment and transfer as reduced by amount received on sell of shares i.e., net of sale consideration is divided by net quantity of shares acquired.

48. Our Promoters will continue jointly to retain majority control over our Company after the Issue, which will allow them to determine the outcome of matters submitted to shareholders for approval.

Post this Issue, our Promoters will collectively own 62.12% of our post issue equity share capital. As a result, our Promoters will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoters will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

49. *There is no monitoring agency appointed by Our Company to monitor the utilization of the Issue proceeds.*

As per SEBI (ICDR) Regulations, 2018, as amended, appointment of monitoring agency is required only for Issue size above ₹ 10,000.00 Lakhs. Hence, we have not appointed any monitoring agency to monitor the utilization of Issue proceeds. However, the audit committee of our Board will monitor the utilization of Issue proceeds in terms of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

50. *Within the parameters as mentioned in the chapter titled “Objects of this Issue” of this Prospectus, our Company’s management will have flexibility in applying the proceeds of this Issue. The fund requirement and deployment mentioned in the Objects of this Issue have not been appraised by any bank or financial institution.*

We intend to use substantial portion of the Net Issue Proceeds towards meeting the working capital requirement. We intend to deploy the Net Issue Proceeds in financial year 2024-25 and financial year 2025-26 and such deployment is based on certain assumptions and strategy which our Company believes to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc., For further details on the use of the Issue Proceeds, please refer chapter titled “Objects of the Issue” on page 80 of this Prospectus.

The deployment of funds for the purposes described above is at the discretion of our Company’s Board of Directors. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in chapter titled “Objects of the Issue” on page 80 of this Prospectus, the Management will have significant flexibility in applying the proceeds received by our Company from the Issue, subject to approval from Shareholders of the Company. Our Board of Directors will monitor the proceeds of this Issue.

51. *In the event there is any delay in the completion of the Issue, or delay in schedule of implementation, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the objects of the Issue as has been stated in the chapter titled “Objects of The Issue” on Page 80 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, it may adversely affect our revenues and results of operations.

52. *We have not identified any alternate source of raising the funds required for the object of the Issue and the deployment of funds is entirely at our discretion and as per the details mentioned in the section titled “Objects of the Issue”.*

Our Company has not identified any alternate source of funding for our object of the Issue and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds can adversely affect our growth plan and profitability. The delay/shortfall in receiving these proceeds could result in inadequacy of funds or may result in borrowing funds on unfavourable terms, both of which scenarios may affect the business operation and financial performance of the company. Further the deployment of the funds raised in the issue will be entirely at the discretion of the management and any revision in the estimates may require us to reschedule our projected expenditure and may have a bearing on our expected revenues and earnings. Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

56. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

We will also be subject to the provisions of the listing agreements signed with the Stock Exchange. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge, and we cannot assure that we will be able to do so in a timely manner. 60. Our insurance coverage may not adequately protect us against possible risk of loss.

While we believe that we maintain insurance coverage in amounts consistent with industry norms, our insurance policies do not cover all risks and are subject to exclusions and deductibles. If any or all of our facilities or project sites are damaged, in whole or in part, and our operations are interrupted for a sustained period due to fire and similar perils, there can be no assurance that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption or the costs of repairing or replacing the facilities and project sites. If we suffer a large uninsured loss or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition, results of operations and cash flows may be materially and adversely affected.

61. We benefit from our relationship with our Promoters and our business and growth prospects may decline if we cannot benefit from this relationship.

There is no assurance that we will be able to continue to take advantage of the benefits from these relationships in the future. EXTERNAL RISK FACTORS

1. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

Since first being reported in December 2019, the outbreak of COVID-19 has spread globally. The World Health Organization declared the outbreak of COVID-19 to be a public health emergency of international concern on January 30, 2020, and a global pandemic on March 11, 2020.

The COVID-19 pandemic has had, and any future pandemic or widespread public health emergency could have, repercussions across regional and global economies and financial markets. The outbreak of COVID-19 in many countries, including India has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally.

The global impact of the outbreak has been rapidly evolving. As cases of COVID-19 have continued to be identified in additional countries, many jurisdictions, including the governments of India, have reacted by instituting restrictive measures including invoking lock downs and quarantines, requiring the closure of non-essential businesses and placing restrictions on the types of businesses that may continue to operate, mandating restrictions on travel, implementing “shelter-in-place” rules and “stay-at-home” orders, and enforcing remote working regulations. No prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy or localized lockdowns remain unknown.

On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Our business was determined to be operating in an essential industry, which allowed us to continue our operations after the introduction of the lockdown in India, subject to certain adjustments in working patterns.

There can be no assurance that there will not be any material impact on our operations if the outbreak of COVID-19 is not effectively controlled. Although some restrictions have been eased, it is not yet clear when the lockdown conditions will be fully lifted in India. Further, although we were declared an essential business and were able to adjust our business to continue operating during the lockdown, there can be no assurance that further restrictions will not be introduced or that we will continue to retain such essential status. Further, we may be required to quarantine employees, labours that are suspected of being infected of COVID-19, as well as others that have come into contact with those employees, labours or ceasing our operations as a health measure could potentially adversely affect on our business operations or result in delays in project completion and the timely delivery of our projects to our clients. If any of our suppliers are affected by COVID-19 to the extent that our supply chain is disrupted, this may affect our ability to complete the project.

The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on our project and ability to pay for our raw materials; the disruptions or restrictions on our employees’ labours’ and suppliers’ ability to work and travel; any extended period of remote work arrangements; and strain on our or our clients’ business continuity plans, and resultant operational risk.

The COVID-19 pandemic, or any future pandemic or widespread public health emergency could therefore materially and adversely impact our business, financial condition, cash flows and results of operations.

2. *The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.*

Prior to this Issue, there has been no public market for our Equity Shares. Our Company and the Book Running Lead Manager has appointed Spread X Securities Private Limited as Designated Market Maker for the equity shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors,

including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets and Finance industry, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnership, joint ventures, or capital commitments.

3. *You will not be able to sell immediately on Indian Stock Exchanges any of the Equity Shares you purchase in the Issue until the Issue receives appropriate trading permissions.*

The Equity Shares will be listed on the Stock Exchange. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading on stock exchange. We cannot assure you that the Equity Shares will be credited to investor's demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this Prospectus. Any failure or delay in obtaining the approval would restrict your ability to dispose of the Equity Shares. In accordance with section 40 of the Companies Act, if the permission of listing the Equity Shares is denied by the stock exchanges, we are required to refund all monies collected to investors.

4. *Our operations are subject to environmental, health and safety laws and regulations.*

Our operations are subject to various Central and State environmental laws and regulations relating to the control of pollution in the various locations in India where we operate. In particular, the discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liability to the Government and third parties, and may result in our incurring costs to remedy such discharge or emissions. There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of operations, or a material increase in the costs of operations, or otherwise have a material adverse effect on the financial condition and results of our operations. Environmental laws and regulations in India have been increasing in stringency and it is possible that they will become significantly more stringent in the future. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations, may impose new liabilities on us or result in the need for additional investment in pollution control equipment, either of which could adversely affect our business, financial condition or prospects. While as of the date of this Prospectus, we are not subject to any environmental legal proceedings, we may be impleaded in such legal proceedings in the course of our business. Such legal proceedings could divert management time and attention, and consume financial resources in Defense or prosecution of such legal proceedings or cause delays in the construction, development or commencement of operations of our projects. No assurance can be given that we will be successful in all, or any, of such proceedings.

5. *There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the Emerge Platform of National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the Emerge Platform of National Stock Exchange of India Limited. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

6. *We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.*

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

7. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse impact on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that impact our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. There can be no assurance that these tax rates/slab will continue in the future. Further, with the Introduction of the Goods and Services Act, tax rates and its implication may have material impact on our products. Any changes in these tax rates/slabs could adversely affect our financial condition and results of operations.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non- residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting

requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

10. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

11. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Our Company's estimated working capital requirements on a restated basis are based on the following key assumptions:

Sr No	Particulars	Details
Current Assets		
1.	Trade receivables	<p>Trade receivables are amount owed to Company by customers following rendering of services i.e. Sale & Supply of Water Pipeline Construction services, Irrigation Projects services, Road Construction and Building Construction services on credit. The company is engaged in the business wherein realization of payment from the clients undergoes processing delays due to administrative clearances of government departments, after which demand for the payment is made by the accounts department and then the payment is released so normally the debtors period in this business falls between 45-90 days depending on state to state.</p> <p>From FY 2020-21 to FY 2023-24, our trade receivables holding period has witnessed a reduction from 66 days to 53 days. This positive trend can be attributed to the favorable credit terms offered by our clients from Gujarat region and increase in the number of our projects in Gujarat region.</p> <p>Looking ahead, we anticipate Trade Receivable days to be in the range of previous financial years. Company estimates Trade Receivables Holding period of 56 days in FY 2024-25 and gradually increasing with increase in Revenue from Operation to 58 days in FY 2025-26.</p>

Sr No	Particulars	Details
		Increase in Trade Receivable days is mainly due to increase in estimated size of operations of our company.
2.	Inventory (Raw Materials and Components)	<p>Inventories of our company includes Raw Materials and Components consisting of pipes, steel construction material, cement, valves, sand, ready-mix and other hardware items.</p> <p>From FY 2020-21 to FY 2023-24, our inventory holding period has witnessed a reduction from 48 days to 15 days. Over the period the company has increased its focus in the Gujarat region, Gujarat has a well-established network of industries, making it easier to source a wide range of raw materials for various sectors, including infrastructure, engineering and chemicals. This positive trend in the inventory holding period can be attributed to the easy and timely availability of majority of raw material required for project execution.</p> <p>Company estimates raw materials and components holding period to be in the range of 25 to 30 days in the projected period. Increase in raw materials and components is not substantial due to its timely availability and reason for such increase is due to increase in the size of operations of our company.</p>
Current Liabilities		
3.	Trade Payables	<p>Trade payables are amount to be paid to suppliers by company following purchase of raw materials & components, stock-in-trade and other expenses on credit. Historically, our trade payables holding period from FY 2020-21 to FY 2023-24 were in the range of 84 to 36 days.</p> <p>Company estimates Trade Payable Holding period of 56 days in FY 2024-25 (in line with average holding period for FY 2020-21 to FY 2023-24) and gradually decreasing to 52 days in FY 2025-26. Company expects better pricing and continuous supply from vendors by making early payment and negotiating better deals. With improved cash flow, we can settle our trade payables more promptly, further reducing the holding period which will provide better pricing from vendors and negotiating better deals.</p>

Apart from above there are other working capital requirements such as Deposit under lien, Cash and cash equivalents, Other Assets, Loans and advances, Short Term Provisions and Other Current Liabilities. Details of which are given below.

For Higher Bank Guarantee limits our company has to maintain a healthy balance with banks in form of Fixed Deposit.</p>
Cash and Cash Equivalents	<p>Cash and cash equivalents include cash in hand and balance in current account excluding Deposits held under lien. Cash and Cash Equivalent balance is estimated based on amount required for day-to-day Business operation and for expected Business requirement of company.</p>
Loans and Advances	<p>Loans and Advances includes, Tax deduction at source, Advances recoverable in cash or kind, Advance income tax (net of provision for income tax), Prepaid expenses, Balances with government authorities and MAT credit entitlements. GLOBAL OUTLOOK

Global economic activity continues to soften, amid the effects of tight monetary policies, restrictive financial conditions, and weak global trade growth. After a sharp slowdown in 2022 and another decline last year, global output growth is set to edge down in 2024, marking the third consecutive year of deceleration. The recent conflict in the Middle East has heightened geopolitical risks and raised uncertainty in commodity markets, with potential adverse implications for global growth. This comes while the world economy is continuing to cope with the lingering effects of the overlapping shocks of the past four years—the COVID-19 pandemic, the Russian Federation’s invasion of Ukraine, and the rise in inflation and subsequent sharp tightening of global monetary conditions.

Near-term prospects are diverging (figure 1.1.A). Growth in advanced economies as a whole and in China is projected to slow in 2024 to well below its 2010-19 average pace. Meanwhile, aggregate growth is set to improve in EMDEs with strong credit ratings, remaining close to pre-pandemic average rates. Although overall growth is also expected to firm somewhat from its 2023 low in EMDEs with weak credit ratings, the outlook for many such countries remains precarious, given elevated debt and financing costs, and idiosyncratic headwinds such as conflict.

Global headline and core inflation have continued to decline from 2022 peaks. Nonetheless, inflation remains above target in most advanced economies and about half of inflation-targeting EMDEs. Global inflation is projected to remain above its 2015-19 average beyond 2024 (figure 1.1.B). Monetary tightening in advanced economies is concluding, but real policy interest rates are expected to remain elevated for some time, as inflation returns to target only gradually. This will keep the stance of advanced-economy monetary policies restrictive in the near-term, following the largest and fastest increase in U.S. real policy rates since the early 1980s (figure 1.1.C).

Long-term yields on advanced-economy government bonds were volatile in 2023, reflecting shifting expectations about the path of future interest rates and sizable movements in term premia. Although yields have retreated from their late-October peaks, they still imply increased fiscal vulnerabilities, given that median global government debt has risen by 20 percentage points of GDP since 2007, when U.S. yields were last at their current levels. The drag on growth from monetary tightening is expected to peak in 2024 in most major economies, assuming an orderly evolution of broader financial conditions. Thus far, headwinds to growth from elevated interest rates have been offset, to some degree, by households and firms spending out of savings buffers, resilient risk appetite, and extended maturities on stocks of low-cost debt, as well as by expansionary fiscal policy in some cases, most notably the United States.

Global trade growth in 2023 was the slowest outside global recessions in the past 50 years, with goods trade contracting amid pandemic global industrial production. Services trade has continued to recover from the effects of the pandemic, but at a slower pace than previously expected. Global trade growth is projected to pick up to 2.3 percent in 2024, partly reflecting a recovery of demand for goods and, more broadly, in advanced-economy trade (figure 1.1.D).

The recent conflict in the Middle East has so far had only a muted impact on commodity prices. In 2023 as a whole, most commodity prices weakened to varying degrees; however, they remain above pre-pandemic levels. Despite recent volatility triggered mainly by the conflict, and assuming hostilities do not escalate, average oil prices in 2024 are projected to edge down as global growth weakens and oil production increases.

Against this backdrop, global growth is estimated to have weakened last year to 2.6 percent. Although this is 0.5 percentage point higher than last June’s forecast, it is mainly due to better than-expected growth in the United States. Global growth is forecast to slow again, to 2.4 percent in 2024. This deceleration reflects softening labor markets, reduced savings buffers, waning pent-up demand for services, the lagged effects of monetary tightening, and fiscal consolidation. Over 2020-24, the forecast entails the weakest start to a decade for global growth since the 1990s—another period characterized by geopolitical strains and a global recession (figure 1.1.E; Kose, Sugawara, and Terrones 2020). Global growth is projected to pick up to 2.7 percent in 2025, as inflation continues to slow, interest rates decline, and trade growth firms.

A. Growth, by economy and EMDE credit rating

B. Global consumer price inflation

C. U.S. real interest rate cycles

D. Contributions to global trade growth

E. Global growth

F. EMDE bond yields minus nominal growth rates

Advanced-economy growth is set to bottom out at 1.2 percent in 2024 as growth in the United States slows, while euro area growth, which was feeble last year, picks up slightly as lower inflation boosts real wages. In 2025, growth in advanced economies is forecast to pick up to 1.6 percent as the euro area continues to recover and U.S. growth edges up toward its long-term trend rate amid declining inflation and more supportive monetary policy.

Growth in EMDEs is forecast to average 3.9 percent a year over 2024-25. China's growth is expected to slow notably this year, as tepid consumer sentiment and a continued downturn in the property sector weigh on demand and activity. Excluding China, EMDE growth is set to firm from 3.2 percent in 2023 to 3.5 percent this year and 3.8 percent in 2025. This pickup reflects a rebound in trade and improving domestic demand in several large economies, as inflation continues to recede. Nonetheless, elevated borrowing costs will continue to squeeze fiscal space in EMDEs: U.S. dollar-denominated bond yields are well above the growth rates of nominal GDP in many countries, especially those with weaker

creditworthiness (figure 1.1.F). Although growth in low income countries (LICs) is forecast to firm, this will follow a feeble recovery from 2020, with violence and political instability in some countries curtailing activity last year.

In all, the EMDE recovery from the 2020 pandemic recession remains modest. This reflects the negative effects of headwinds such as tight global financial conditions, a weak recovery in global trade, sharp domestic monetary tightening to tame inflation, the marked slowdown in China, and increased conflict. It also reflects the longer term downtrend in EMDE potential growth, including in China, due to decelerating investment and productivity growth, slowing labor force growth amid population aging, and the diminishing growth benefits of improvements in education and health (Kose and Ohnsorge 2023).

Risks to the outlook remain tilted to the downside, although they have become somewhat more balanced since June, following continued declines in inflation and the stabilization of advanced-economy banking systems after stresses early last year. The recent conflict in the Middle East, coming on top of Russia's invasion of Ukraine, has sharply heightened geopolitical risks. Intensification of these conflicts, or increasing geopolitical tensions elsewhere, could have adverse global repercussions through commodity and financial markets, trade, and confidence. Recent attacks on commercial vessels transiting the Red Sea have already started to disrupt key shipping routes, eroding slack in supply networks and increasing the likelihood of inflationary bottlenecks. In a setting of escalating conflicts, energy supplies could also be substantially disrupted, leading to a spike in energy prices. This would have significant spillovers to other commodity prices and heighten geopolitical and economic uncertainty, which in turn could dampen investment and lead to a further weakening of growth.

On the upside, resilient economic activity and declining inflation in the United States could be sustained, even in the face of substantial headwinds, if aided by further labor supply improvements. There is therefore a possibility that U.S. growth continues to be stronger than projected as price pressures recede and monetary policy is eased, which would bolster global activity.

If any of the aforementioned downside risks were to materialize, they could lead to weaker growth than projected in the baseline. Alternative downside scenarios—including higher oil prices due to an escalation of geopolitical tensions, financial stress in EMDEs that leads to surging sovereign spreads, and weaker growth in China resulting in adverse global spillovers via commodity and other channels—show that in each case global growth in 2024 would be reduced by 0.2 percentage point below the baseline. In contrast, an upside scenario with higher-than expected U.S. growth due to continuing strong supply conditions could boost global growth by 0.2 percentage point this year.

Global Trade

Global trade in goods and services was virtually flat in 2023, growing by an estimated 0.2 percent—the slowest expansion outside global recessions in the past 50 years. Goods trade contracted last year, reflecting declines in key advanced economies and deceleration in EMDEs, and mirroring the sharp slowdown in the growth of global industrial production. This marked the first sustained contraction in goods trade outside a global recession in the past 20 years (figure 1.3.A). Reflecting stagnant goods trade and fading pandemic-era disruptions, global supply chain pressures have returned to pre-pandemic averages after receding to record lows in mid-2023. Services trade slowed in the second half of 2023, following an initial rebound from the pandemic (figure 1.3.B).

After lagging the pace of global growth in 2023, global trade is projected to pick up to 2.3 percent in 2024, mirroring projected growth in global output (figure 1.3.C). This reflects a partial normalization of trade patterns following exceptional weakness last year (WTO 2023). Goods trade is envisaged to start expanding again, while the contribution of services to total trade growth is expected to decrease, aligning more closely with the trade composition patterns observed before the pandemic. However, in the near term, the responsiveness of global trade to global output is expected to remain lower than before the pandemic, reflecting subdued investment growth. This is because investment tends to be more trade-intensive than other types of expenditures. Global tourist arrivals are expected to return to pre-pandemic level in 2024, although the recovery is set to lag in some countries where reopening was delayed.

The global trade growth forecast for 2024 has been revised down by 0.5 percentage point since June, reflecting weaker-than-expected growth in China and in global investment. As a result, the recovery of trade now projected for 2021-24 is the weakest following a global recession in the past half century (figure 1.3.D).

Geopolitical uncertainty, especially in light of ongoing armed conflicts, and the possibility of a more protracted slowdown in China pose downside risks to the trade outlook. Another downside risk arises from the possibility of further measures to restrict international trade. The recent increase in the use of restrictive trade policies, as well as subsidies and industrial policies aimed at localizing production, has accelerated the reshoring of activities by U.S. and European Union (EU) multinationals, although some of this reflects a desire by firms to diversify sourcing to reduce exposure to adverse shocks (Aiyar, Presbitero, and Ruta 2023; Freund et al. 2023). Continuation of this trend could result in more fragmented supply chains and slower trade growth than projected in the baseline.

FIGURE 1.3 Global trade

Global goods trade contracted in 2023, marking the first annual decline outside of global recessions in the past 20 years. Services trade growth slowed in the second half of last year, following an initial rebound from the pandemic. After stagnating in 2023, global trade in goods and services is projected to grow by 2.3 percent in 2024. The recovery in global trade in 2021-24 is projected to be the weakest following a global recession in the past half century.

A. Growth of global goods trade and industrial production

B. Global PMI new export orders

C. Global trade growth

D. Global trade around global recessions

Global Inflation

Global headline consumer price inflation declined substantially in 2023. Moderating energy and food price inflation, along with slowing consumer demand for goods and the recovery of global supply chains, exerted significant downward pressure on goods inflation. Nonetheless, inflation remains above targets in most advanced economies and in about half of inflation-targeting EMDEs. In the major advanced economies, the rotation of demand from goods to services continued. Declining goods inflation amid easing import prices was partly offset, however, by persistent services inflation tied to tight domestic labor markets. As a result, core inflation, which surged less than headline inflation in 2021-22, has also declined less since its 2022 peak.

In 2024-25, global inflation is expected to decline further, underpinned by the projected weakness in global demand growth and slightly lower commodity prices. Subdued demand reflects the effects of tight monetary and credit conditions and

softening labor markets. Thus, global headline inflation, on a year-on-year basis, is forecast to recede to 3.7 percent in 2024 and 3.4 percent in 2025—still above the pre-pandemic (2015-19) average but closer to central bank inflation targets (figure 1.5.E). Surveys of inflation expectations similarly suggest a steady decline in inflation, but to levels in 2024 that are still higher than prepandemic averages (figure 1.5.F). In particular, Consensus forecasts indicate lower inflation this year than last in 85 percent of EMDEs.

Global financial developments

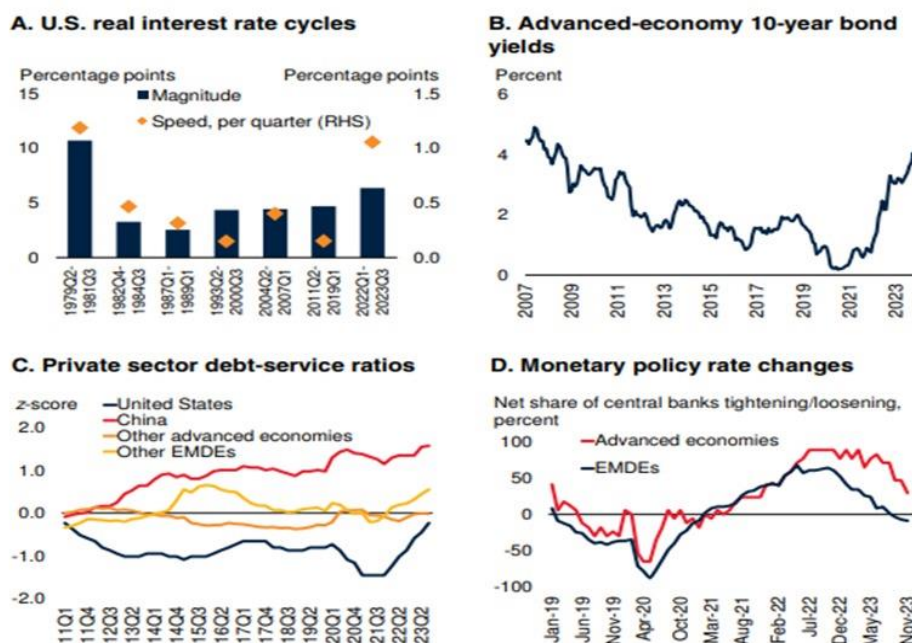

Monetary tightening in advanced economies is concluding, with subsequent easing of policy interest rates likely to proceed at a measured pace. This, alongside softening inflation, could keep real policy rates elevated for an extended period, following the largest and fastest increase in real U.S. policy rates since the early 1980s (figure 1.6.A). In the United States, tight monetary policy reflects better-than-expected growth outturns. In the euro area, persistent core inflation has played a larger role. Reflecting both the outlook for policy rates and volatile term premia, government bond yields in advanced economies in October reached their highest levels since the late 2000s. Although yields have pulled back since then, they remain at levels that will put upward pressure on the cost of capital for governments and firms as debts are rolled over (figure 1.6.B).

High financing costs have been reflected in credit market developments. Advanced-economy banks have been reporting restrictive lending standards, and bank credit growth has slowed sharply. In addition, corporate bankruptcies and credit card delinquencies have picked up. Although private sector debt-service ratios remain generally manageable, reflecting the stock of debt issued at low fixed rates, they have been trending up, most notably in China (figure 1.6.C). Risk appetite in advanced-economy financial markets has nonetheless been resilient, which has somewhat mitigated the tightening effect of higher interest rates on broad financial conditions. Indeed, equity volatility was subdued in the second half of 2023, while corporate credit spreads were generally below 2000-19 median levels.

Across EMDEs, a rising number of central banks have started cutting policy rates, with further reductions expected in the coming months, especially in Europe and Latin America (figure 1.6.D). Most EMDEs have so far exhibited few signs of financial stress, despite higher interest rates. This is likely due to a mix of factors, including better-than-expected growth, limited current account vulnerabilities, and declining inflation following proactive monetary tightening, all of which have helped contain currency depreciation.

FIGURE 1.6 Global financial developments

Advanced-economy monetary policies are expected to remain tight—including in the United States, following the largest and fastest increase in real policy rates since the early 1980s. In October, advanced-economy government bond yields reached their highest levels since the late 2000s, though they have since pulled back. Private sector debt-service ratios remain manageable but have been trending up, particularly in China. Central banks in a growing number of EMDEs have started to cut rates ahead of advanced economies. Financial strains are evident in the one fourth of EMDEs with weak credit ratings: they stopped issuing international bonds two years ago and many have experienced sharp currency depreciation.

(Source: Global Economic Prospects, January 2024)

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed. The widening of the CAD may also continue as global commodity prices remain elevated and the growth momentum of the Indian economy remains strong. The loss of export stimulus is further possible as the slowing world growth and trade shrinks the global market size in the second half of the current year.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. A much-improved financial health of well-capitalised public sector banks has positioned them better to increase the credit supply. Consequently, the credit growth to the Micro, Small, and Medium Enterprises (MSME) sector has been remarkably high, over 30.6 per cent, on average during Jan-Nov 2022, supported by the extended Emergency Credit Linked Guarantee Scheme (ECLGS) of the Union government. The increase in the overall bank credit has also been influenced by the shift in borrower's funding choices from volatile bond markets, where yields have increased, and external commercial borrowings, where interest and hedging costs have increased, towards banks. If inflation declines in FY24 and if real cost of credit does not rise, then credit growth is likely to be brisk in FY24.

India's economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of Goods and Services Tax (GST) they pay, while the Emergency Credit Linked Guarantee Scheme (ECLGS) is easing their debt servicing concerns. The Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS) has been directly providing jobs in rural areas and indirectly creating opportunities for rural households to diversify their sources of income generation. Schemes like PM-Kisan and PM Garib Kalyan Yojana have helped in ensuring food security in the country, and their impact was also endorsed by the United Nations Development Programme (UNDP). The results of the National Family Health Survey (NFHS) also show improvement in rural welfare indicators from FY16 to FY20, covering aspects like gender, fertility rate, household amenities, and women empowerment.

ABSTRACT OF THE REPORT

Driven by a better-than-expected performance in Q2 of FY24 and above 7 per cent growth projection for FY24 (by MoSPI in its first advance estimates), many global agencies have revised India's growth projection in the upward direction. This reflects the resilience of the Indian economy to sustain its growth path amidst ongoing geopolitical headwinds. The measures announced in the Interim Union Budget FY25 are expected to play a pivotal role in supporting India's growth journey ahead.

Increased Government spending on capex announced in the Union Budget has not resulted in a huge jump in its total expenditure. Rather, there has been a reprioritisation in Government spending as reflected in an improvement in the capital outlay to revenue expenditure ratio. Despite rising capex, required expenditures to protect the people from the impact of uncertainties have not been compromised. The Government's inclusive approach to economic growth is highlighted in a slew of initiatives that have been announced for the poor, women, youth, and farmers. Amidst changing spending patterns,

the Government's commitment towards fiscal consolidation has not been compromised, as it stands firm to follow the glide path. The Government has lowered its Fiscal Deficit estimate for FY24 to 5.8 per cent of Nominal GDP, compared to the Budget Estimate of 5.9 per cent, and stands committed to lowering it further to 5.1 per cent in FY25.

Global slowdown, especially in India's major trading partners, has led to a slowdown in demand for India's merchandise exports. At the same time, there has been a decline in the overall value of imports due to a fall in international commodity prices, which spiked after the outbreak of the Russia-Ukraine conflict. This has led to a narrowing of India's merchandise trade deficit in the first ten months of FY24. A narrowing merchandise trade deficit, coupled with rising net services receipts, is expected to result in an improvement in India's current account deficit. As far as capital account is concerned, India's strong macroeconomic fundamentals, high growth and stable business environment have boosted Foreign Portfolio Inflows (FPIs).

Inflationary pressures have moderated in January 2024 due to a fall in food as well as core inflation. The recent measures announced by the Government to control food prices, are likely to reduce inflation further. The expectations of the fading away of El Nino and the forecast of a normal monsoon bodes well for a better-than-normal kharif sowing.

OUTLOOK

Going forward, the outlook for the Indian economy appears bright. RBI has forecasted India's Real GDP to grow at 7 per cent in FY25, with risks evenly balanced. Prospects of healthy rabi harvesting, sustained manufacturing profitability and underlying service resilience are expected to support economic activity in FY25. On the demand side, household consumption is expected to improve, while prospects for capital formation are bright owing to an upturn in the private capex cycle, improved business sentiments, healthy balance sheets of banks and corporates, and the government's continued thrust on capital expenditure. Improvement in the outlook for global trade and rising integration in the global supply chain will support net external demand. However, headwinds from geopolitical tensions, such as supply chain disruptions and higher logistics costs, volatility in international financial markets, and geoeconomic fragmentation, pose downside risks.

Downside risks to trade include a spike in new commodity prices from geopolitical shocks, including continued attacks in the Red Sea and supply disruptions or more persistent underlying inflation in the developed world, which could extend tight monetary conditions. This could impact the expected recovery in global demand, thereby affecting the prospects for India's exports. On the contrary, the average crude oil FOB price for the Indian basket for FY24 (up to 12 February 2024) at USD 82.2/bbl remains lower than the average of USD 93.2/bbl during FY23. Core inflation for FY24 (up to January 2024) is also the lowest since FY21 (MOSPI). Lower input prices and overall inflation can influence output growth positively, which in turn can further improve the prospects for exports. Given persisting uncertainties for global output and trade growth, finding ways to enhance the competitiveness and attractiveness of India's exports is both urgent and important.

As far as inflation is concerned, according to the latest release of inflation data for January 2024, month-on-month momentum in price indices of vegetables, pulses and overall food items is (-) 4.2 per cent, (-) 0.9 per cent and (-) 0.7 per cent, respectively. Hence, it is expected that food inflation will moderate further in the upcoming months. RBI has revised the inflation projection for Q4 of FY24 downward to 5 per cent in the Monetary Policy Statement of February 2024, from 5.2 per cent in the previous MPC meeting. RBI has also kept the policy rate unchanged at 6.5 per cent to facilitate full monetary transmission. With the stable downward movement in core inflation and moderation in food prices, the outlook for a reasonably low headline inflation rate is good.

INDUSTRY – INFRASTRUCTURE SECTOR

India's high growth imperative in 2023 and beyond will significantly be driven by major strides in key sectors with infrastructure development being a critical force aiding the progress.

Infrastructure is a key enabler in helping India become a US \$26 trillion economy. Investments in building and upgrading physical infrastructure, especially in synergy with the ease of doing business initiatives, remain pivotal to increase efficiency and costs. Prime Minister Mr. Narendra Modi also recently reiterated that infrastructure is a crucial pillar to ensure good governance across sectors.

The government's focus on building infrastructure of the future has been evident given the slew of initiatives launched recently. The US\$ 1.3 trillion national master plan for infrastructure, Gati Shakti, has been a forerunner to bring about systemic and effective reforms in the sector, and has already shown a significant headway.

Infrastructure support to nation's manufacturers also remains one of the top agendas as it will significantly transform goods and exports movement making freight delivery effective and economical.

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India’s overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. The Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development. In other words, the infrastructure sector acts as a catalyst for India’s economic growth as it drives the growth of the allied sectors like townships, housing, built-up infrastructure, and construction development projects.

To meet India’s aim of reaching a US\$ 5 trillion economy by 2025, infrastructure development is the need of the hour. The government has launched the National Infrastructure Pipeline (NIP) combined with other initiatives such as ‘Make in India’ and the production-linked incentives (PLI) scheme to augment the growth of infrastructure sector. Historically, more than 80% of the country’s infrastructure spending has gone toward funding for transportation, electricity, and water& irrigation. While these sectors still remain the key focus, the government has also started to focus on other sectors as India’s environment and demographics are evolving. There is a compelling need for enhanced and improved delivery across the whole infrastructure spectrum, from housing provision to water and sanitation services to digital and transportation demands, which will assure economic growth, increase quality of life, and boost sectoral competitiveness.

MARKET SIZE

In Budget 2023-24, capital investment outlay for infrastructure is being increased by 33% to Rs.10 lakh crore (US\$ 122 billion), which would be 3.3 per cent of GDP. As per the Union Budget 2023-24, a capital outlay of Rs. 2.40 lakh crore (US\$ 29 billion) has been provided for the Railways, which is the highest ever outlay and about 9 times the outlay made in 2013-14.

Starting with 6,835 projects, the NIP project count now stands at 9,142 covering 34 sub-sectors, as per news reports. Under the initiative, 2476 projects are under the development phase with an estimated investment of US\$ 1.9 trillion. Nearly half of the under-development projects are in the transportation sector, and 3,906 are in the roads and bridges sub-sector.

The Indian Railways expects to complete total revenue of Rs. 2,64,500 crore (US\$ 31.81 billion) by the end of 2023-24.

India’s Logistics Market is estimated to be US\$ 435.43 billion in 2023 and is expected to reach US\$ 50.52 billion by 2028, growing at a CAGR of 8.36%.

India intends to raise its ranking in the Logistics Performance Index to 25 and bring down the logistics cost from 14% to 8% of GDP, leading to a reduction of approximately 40%, within the next five years.

In December 2022, AAI and other Airport Developers have targeted capital outlay of approximately Rs. 98,000 crore (US\$ 11.8 billion) in airport sector in the next five years for expansion and modification of existing terminals, new terminals and strengthening of runways, among other activities.

India plans to spend US\$ 1.4 trillion on infrastructure through ‘National Infrastructure Pipeline’ in the next five years. In FY21, infrastructure activities accounted for 13% share of the total FDI inflows of US\$ 81.72 billion. India will need to construct 43,000 houses every day until 2022 to achieve the vision of Housing for All by 2022. As of August 22, 2022, 122.69 lakh houses have been sanctioned, 103.01 lakh houses have been grounded, and 62.21 lakh houses have been completed, under the Pradhan Mantri Awas Yojna scheme (PMAY-Urban).

Hundreds of new cities need to be developed over the next decade. Over the next 10 years, demand for urban freight is predicted to increase by 140%. Final-mile freight transit in Indian cities accounts for 50% of the total logistics expenditures in the country’s increasing e-commerce supply chains. India is expected to become the third-largest construction market globally by 2022. Indian logistics market is estimated to touch US\$ 320 billion by 2025. The overall infrastructure capex is estimated to grow at a CAGR of 11.4% over 2021-26 driven by spending on water supply, transport, and urban

infrastructure. Investment in infrastructure contributed around 5% of the GDP in the tenth five-year plan as against 9% in the eleventh five-year plan. Further, US\$ 1 trillion investment in infrastructure was proposed by the India's planning commission during the 12th five-year plan, with 40% of the funds coming from the private sector.

ROAD AHEAD

India must enhance its infrastructure to reach its 2025 economic growth target of US\$ 5 trillion. India's population growth and economic development requires improved transport infrastructure, including through investments in roads, railways, and aviation, shipping and inland waterways.

The government has also suggested an investment of \$750 billion to strengthen railway infrastructure and envisioned the Maritime India Vision 2030 which estimates massive investments in world-class infrastructure development at Indian ports.

Global investment and partnerships in infrastructure, such as the India-Japan forum for development in the Northeast are also indicative of more investments. These initiatives come at a momentous juncture as the country aims for self-reliance in future-ready and sustainable critical infrastructure.

India, it is estimated, needs to invest \$840 billion over the next 15 years into urban infrastructure to meet the needs of its fast-growing population. This investment will only be rational as well as sustainable, if we additionally focus on long-term maintenance and strength of our buildings, bridges, ports and airports.

As a result of digitalisation and opportunities that tier II and III cities present for economic growth, the divide between metro and non-metros is blurring, moving to the new era of infrastructure growth. Commercial real estate properties have witnessed exponential growth in demand across Tier II & III cities as Information technology and Information technology enabled services and banking financial services and insurance focused organizations are increasingly decentralizing their operations to adapt to the new normal.

The residential sector has witnessed good sales, and launches have also shown signs of an uptick during 2022, total sales in the top-7 cities was projected to exceed 360,000 units in 2022.

Civil Aviation Ministry's "Vision 2040" report states that there will be 190-200 functioning airports in India by 2040. Delhi and Mumbai will have three international airports each, while top 31 Indian cities will have two operational airports each.

220 destinations (airports/heliports/water aerodromes) under UDAN are targeted to be completed by 2026 with 1000 routes to provide air connectivity to unconnected destinations in India.

102 critical projects under the Gati Shakti masterplan worth \$7.67 billion are to be completed by 2024, making 2023 a critical year for effective execution and celerity of completion.

India's Infrastructure forms an integral part of the country's economic ecosystem. There has been a significant shift in the industry that is leading to the development of world-class facilities across the country in the areas of roads, waterways, railways, airports, and ports, among others. The country-wide smart cities programmes have proven to be industry game-changers. Given its critical role in the growth of the nation, the infrastructure sector has experienced a tremendous boom because of India's necessity and desire for rapid development. The expansion has been aided by urbanisation and an increase in foreign investment in the sector.

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. The Government has suggested investment of Rs. 5,000,000 crore (US\$ 750 billion) for railways infrastructure from 2018-30. India's GDP is expected to grow by 8% over the next three fiscal years, one of the quickest rates among major, developing economies, according to S&P Global Ratings. India and Japan have joined hands for infrastructure development in India's Northeast states and are also setting up an India-Japan Coordination Forum for development of Northeast to undertake strategic infrastructure projects for the region.

India being a developing nation is set to take full advantage of the opportunity for the expansion of the infrastructure sector, and it is reasonable to conclude that India's infrastructure has a bright future ahead of it.

BUSINESS PROCESS

We undertake projects on (Engineering, Procurement, Construction) (EPC) basis, with or without operation and maintenance services (“O&M”). The scope of our services includes detailed engineering of the project, procurement of key materials, and project execution at the sites with overall project management up to the commissioning of these projects. In addition, we also undertake operation and maintenance of projects in accordance with our contractual arrangements. Our employee resources and fleet of equipment, together with our engineering capabilities, enable us to execute a range of projects on turnkey basis.

The Process flow of our business operations is described below:

➤ **Project Identification and Bid Preparation:**

The work begins by identifying potential water infrastructure projects through various means, including government announcements, public tenders, or direct invitations from government agencies.

They assess the feasibility of each project based on factors such as budget, scope, timeline, technical requirements, and potential risks.

The Company prepares a bid in response to the government's request for proposals (RFPs) or invitations to tender (ITT), which includes detailed information about their proposed approach, technical specifications, cost estimates, and any other relevant documentation required by the tendering process.

➤ **Contract Award:**

After submitting a bid, the government or relevant authorities evaluate the proposals based on predefined criteria, such as technical capability, price, and compliance with regulatory requirements.

The contract is awarded to the bidder whose proposal best meets the evaluation criteria, and negotiations may then occur to finalize the terms and conditions, scope of work, timeline, and budget.

Once the contract is signed, the company may be required to provide performance bonds or other forms of financial security to guarantee their commitment to the project.

➤ **Procurement of Materials:**

The Company identifies the specific materials required for the project based on the approved design and specifications.

They procure materials from approved suppliers or through competitive bidding processes, ensuring compliance with quality standards and regulatory requirements.

The Company may establish supply chain management processes to track inventory, manage orders, and coordinate deliveries to the construction site in accordance with the project timeline.

➤ **Project Planning and Design:**

The Company develops detailed plans and designs for the water infrastructure project, which may include site surveys, engineering drawings, and technical specifications.

They work with architects, engineers, and other stakeholders to optimize the design and address any technical challenges or regulatory constraints.

The design phase also involves obtaining necessary permits, approvals, and environmental assessments from relevant authorities to ensure compliance with legal and regulatory requirements.

➤ **Site Preparation:**

Before commencing construction, the Company prepares the construction site by clearing vegetation, removing obstacles, and levelling the terrain as needed.

They establish temporary facilities such as access roads, construction offices, and storage areas to support the construction activities.

Site preparation also includes implementing erosion control measures and ensuring compliance with health and safety regulations to protect workers and the environment.

➤ **Pipe Laying and Joining:**

The Company begins the construction phase by excavating trenches along the designated route for laying the pipes.

They install the pipes according to the approved design and alignment, ensuring proper depth, slope, and spacing between joints.

Various techniques are used to join the pipes securely, including welding, fusion bonding, threading, or using mechanical couplings and fittings.

Quality control measures are implemented throughout the installation process to verify the integrity of the pipes and joints and prevent defects or leaks.

➤ **Commissioning and Testing:**

Once the pipes are laid and joined, the company conducts comprehensive testing and commissioning activities to ensure the system functions as intended.

Pressure testing is performed to verify the structural integrity of the pipelines and identify any leaks or defects.

Water quality testing is conducted to ensure compliance with regulatory standards and assess the suitability of the water for public consumption.

The company also tests the operation of ancillary infrastructure such as pumping stations, valves, and control systems to ensure they function properly and meet performance requirements.

➤ **Installation of Ancillary Infrastructure:**

In addition to laying pipes, the company installs ancillary infrastructure such as pumping stations, control valves, meters, and distribution networks to facilitate the efficient distribution of water to the general public.

These components are installed according to the approved design and specifications, with careful attention to integration, alignment, and operational efficiency.

The company may also implement monitoring and control systems to optimize the operation of the water infrastructure and minimize energy consumption and maintenance costs.

➤ **Final Inspection and Handover:**

After completing construction and commissioning activities, the Company conducts a final inspection to verify that all work complies with the contract requirements, regulatory standards, and approved plans.

Any deficiencies or discrepancies are identified and rectified before formal acceptance and handover of the project to the client or relevant authorities.

The Company provides documentation such as as-built drawings, operation and maintenance manuals, and warranty information to support the ongoing management and maintenance of the water infrastructure system.

➤ **Maintenance and Support:**

Depending on the terms of the contract, the Company may provide ongoing maintenance and support services to ensure the long-term performance and reliability of the water infrastructure system.

It may involve routine maintenance tasks such as inspections, repairs, and replacements of components, as well as emergency response services in the event of failures or disruptions.

The Company may also provide training and technical assistance to the client's staff to ensure they are equipped to operate and maintain the water infrastructure effectively.

OUR SERVICES

Our Engineering Procurement and Construction (EPC) operations are broadly divided into the following segments:

- **Water Pipeline Construction -**

This rapidly growing sector encounters a lot of trouble while supplying water in terms of efficiency, safety, timely water supply, drainage, and management due to increasing demand. We have executed numerous water supply projects in several cities and rural areas of India. We promote sustainable water management which is an important step toward managing scarce resources. We provide solutions for water supply-related problems. With our smart infrastructure and management, we have contributed towards conserving depleted resources through a reduction in wastage, leakage, and pilferage. Our project design maintains the performance of the drinking water network, and the quality of distributed water, and effectively manages, protects, and preserves the water assets. With interlinking of rivers government is trying to distribute surface water to the furthest areas of the country from rivers. With various pipeline and regional water supply schemes the water is supplied to the various districts of the countries. We are one of the key players in the country in bulk pipelines and RWSS projects. Service of water pipeline construction consist of around 85% of our total services.

- **Irrigation Projects**

Micro irrigation system is useful in optimizing the yield of crops (Justify the slogan 'Per Drop More Crop') and minimize the losses which are inevitable in conventional system. Micro irrigation is the slow application of continuous drips, bubbler, subsurface or sprays of water above or below the soil surface. This system is most suitable for water scarce areas and in hilly terrains where ground is uneven and undulating. Besides, it helps reduce water consumption, growth of unwanted plants (weeds), soil erosion and cost of cultivation. Service of irrigation consist of around 5% of our total services.

- **Road Construction**

Presently V.L.Infraprojects Limited is executing small sub-contracting works in Road projects like road shoulder bund preparation, small bridges and RCC road works only. Service of road construction consist of around 5% of our total services.

- **Building Construction**

We are doing private building works as sub-contractor. In that we mainly execute the Earth work, RCC works and brick masonry works for Office buildings and residential apartments. Service of building construction consist of around 5% of our total services.

Summary of significant accounting policies

a. Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b. Property, Plant and equipment

Property, Plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Subsequent expenditure related to an item of Property, Plant and equipment is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing Property, Plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

c. Depreciation

Depreciation on Property, Plant and Equipment is calculated on a straight-line basis using the rates arrived at based on the useful lives estimated by the management which coincides with the rates prescribed under Schedule II to the Companies Act, 2013.

The Company has used the following rates to provide depreciation on its Property, Plant and Equipment.

Asset Description	Useful lives estimated by the Management (years)
Plant and equipment	8
Vehicles	8 to 10
Furniture & Fixtures	10
Office Equipment	5
Temporary structures	2
Computers	3

d. Impairment of tangible and intangible assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the assets recoverable amount. An asset recoverable amount is higher of an asset's or cash generating unit's (CGU) net selling price and its value in use. the recoverable amount is determined for and individual asset, unless the asset doesnot generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. in assessing value in use, the estimated future cash flows are discounted to their present value using a pre tax discount rate that reflects current market assessments of the time value of money and the risks specific to the assets. After impairment, depreciation is provided and the revised carrying amount of the asset over its remaining useful life.

e. Inventories

Raw Materials, components, stores and spares are valued at lower of cost and net realizable value.

Cost is determined on a First in First out (FIFO) basis. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs necessary to make the sale.

Cost of inventories comprise of all costs of purchases, costs of conversion and other costs incurred in bringing them to their respective present location and condition. Stock of construction materials, stores, spares and oil and lubricants as certified by the management have been valued at cost.

f. Revenue recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be reliably measured.

Revenue from contracts:

Revenue and costs associated there with have been recognised in accordance with AS 7 Constructions Contracts.

Revenue from Construction contracts is recognised by reference to the stage of completion of the contract activity at the reporting date of the financial statements on the basis of percentage of completion method. The stage of completion of contracts is measured by reference to the proportion that contract cost incurred for work performed up to the reporting date bear to the estimated total contract cost for each contract.

An expected loss on construction contract is recognised as an expense immediately and it is certain that the total contract cost will exceed the total contract revenue.

Incentive payments, as per the customer specified performance standards, are included in the contract revenue only when:

- a. The contract is sufficiently advanced that it is probable that the specified performance standards will be met; and
- b. The amount incentive payment can be measured reliably.

Revenue from Rendering of Services:

Revenue from service transactions is usually recognised as the service is performed. There are two methods of recognition of revenue from service transaction, Proportionate Completion Method and Completed Service Contract Method company recognises its revenue as per Proportionate completion method.

Proportionate Completion Method is a method of accounting which recognises revenue in the statement of profit and loss proportionately with the degree of completion of services under a contract. Here performance consists of the execution of more than one act. Revenue is recognised proportionately by reference to the performance of each act.

g. Income taxes

Tax expenses comprises of current and deferred tax. Current income tax has been measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 enacted in India. Deferred income taxes reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Deferred tax is measured based on the tax rates and the tax laws enacted or substantively enacted at the balance sheet date.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to the taxes on income levied by same governing taxation laws. Deferred tax assets are recognized only to the extent that there is reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. In situations where the company has unabsorbed depreciation or carry forward tax losses, all deferred tax assets are recognized only if there is virtual certainty supported by convincing evidence that they can be realized against future taxable profits.

At each reporting date, the company re-assesses unrecognized deferred tax assets. It recognizes unrecognized deferred tax asset to the extent that it has become reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets are reviewed at each reporting date. The company writes-down the carrying amount of deferred tax asset to the extent that it is no longer reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available against which deferred tax asset can be realized. Any such write-down is reversed to the extent that it becomes reasonably certain or virtually certain, as the case may be, that sufficient future taxable income will be available.

h. Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

i. Provisions

A provision has been recognized in respect of a present obligation as a result of past event i.e. based on the probability of there being an outflow of resources to settle the obligation, in respect of which a reliable estimate can be made. Provisions have not been discounted to its present value and have been determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. The company does not recognize a contingent liability but discloses its existence in the financial statements.

j. Cash and cash equivalents

Cash and cash equivalents for the purposes of cash flow statement comprises of cash at bank and in hand and short-term investments with an original maturity of three months or less.

k. Investments

SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 read with its circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019, has introduced an alternate payment mechanism using Unified Payments Interface (“UPI”) and consequent reduction in timelines for listing in a phased manner. From January 1, 2019, the UPI Mechanism for RIBs applying through Designated Intermediaries was made effective along with the existing process and existing timeline of T+6 days. (“UPI Phase I”). The UPI Phase I was effective till June 30, 2019.

Subsequently, for applications by Retail Individual Investors through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds has been discontinued and only the UPI Mechanism with existing timeline of T+6 days is applicable for a period of three months or launch of five main board public issues, whichever is later (“UPI Phase II”), with effect from July 1, 2019, by SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2019/76) dated June 28, 2019, read with circular (SEBI/HO/CFD/DIL2/CIR/P/2019/85) dated July 26, 2019. Further, as per the SEBI circular (SEBI/HO/CFD/DCR2/CIR/P/2019/133) dated November 8, 2019, the UPI Phase II had been extended until March 31, 2020. However, due to the outbreak of COVID-19 pandemic, UPI Phase II has been further extended by SEBI until further notice, by its circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020. Thereafter, the final reduced timeline of T+3 days may be made effective using the UPI Mechanism for applications by Retail Individual Investors (“UPI Phase III”), as may be prescribed by SEBI. Further, SEBI, vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, and circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, has introduced certain additional measures for streamlining the process of initial public offers and redressing investor grievances. This circular is effective for initial public offers opening on/or after May 1, 2021, except as amended pursuant to SEBI circular SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021, and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022, and the provisions of this circular are deemed to form part of this Prospectus. Furthermore, pursuant to SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/P/2022/45 dated April 5, 2022, all individual Investors in initial public offerings (opening on or after May 1, 2022) whose application sizes are up to ₹ 500,000 shall use the UPI Mechanism.

Furthermore, SEBI vide press release bearing number 12/2023 has approved the proposal for reducing the time period for listing of shares in public issue from existing 6 working days to 3 working days from the date of the closure of the issue. The revised timeline of T+3 days shall be made applicable in two phases i.e. voluntary for all public issues opening on or after September 1, 2023 and mandatory on or after December 1, 2023. Further, SEBI has vide its circular no. SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 reduced the time taken for listing of specified securities after the closure of a public issue to three Working Days. Accordingly, the Offer will be made under UPI Phase III on a mandatory basis, subject to any circulars, clarification or notification issued by the SEBI from time to time.

Phased implementation of Unified Payments Interface

SEBI has issued UPI Circulars in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIIs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to

up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circulars proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

- a) Phase I: This phase was applicable from January 01, 2019 and lasted till June 30, 2019. Under this phase, a Retail Individual Bidder, besides the modes of Bidding available prior to the UPI Circulars, also had the option to submit the Bid cum Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.
- b) Phase II: This phase has commenced with effect from July 01, 2019 and will continue for a period of three months or floating of five main board public issues, whichever is later. Under this phase, submission of the Bid cum Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds has been discontinued and has been replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.
- c) Phase III: This phase has become applicable on a voluntary basis for all issues opening on or after September 1, 2023 and on a mandatory basis for all issues opening on or after December 1, 2023, vide SEBI circular bearing number SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023 ("**T+3 Notification**"). In this phase, the time duration from public issue closure to listing has been reduced to three Working Days. The Issue shall be undertaken pursuant to the processes and procedures as notified in the T+3 Notification as applicable, subject to any circulars, clarification or notification issued by the SEBI from time to time, including any circular, clarification or notification which may be issued by SEBI.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Issue BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTION ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on foreign direct investment (**FDI**) through press notes and press releases.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (Consolidated FDI Policy), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020. The FDI Policy will be valid until the DPIIT issues an updated circular. FDI in companies engaged in sectors/ activities which are not listed in the FDI Policy is permitted up to 100% of the paid-up share capital of such company under the automatic route, subject to compliance with certain prescribed conditions.

On October 17, 2019, Ministry of Finance, Department of Economic Affairs, had notified the FEMA Rules, which had replaced the Foreign Exchange Management (Transfer and Issue of Security by a Person Resident Outside India) Regulations 2017. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Further, in accordance with the amendment to the Companies (Share Capital and Debentures) Rules, 2014 vide notification dated May 4, 2022 issued by Ministry of Corporate Affairs, a declaration shall be inserted in the share transfer form stipulating whether government approval shall be required to be obtained under Foreign Exchange Management (Non-debt Instruments) Rules, 2019 prior to transfer of shares. Each Bidder should seek independent legal advice about its ability to participate in the Offer.
